2012 Joseph Gelfer, 2014-09-11 21 December 2012 was believed to mark the end of

the thirteenth Baktun cycle in the Long Count of the Mayan calendar. Many people believed this date to mark the end of the world or at the very least a shift to a new form of global consciousness. Examining how much of the phenomenon is based on the historical record and how much is contemporary fiction, the book explores the landscape of the modern apocalyptic imagination, the economics of the spiritual marketplace, the commodification of countercultural values, and the cult of celebrity.

**Bowker's Complete Video Directory 2001**, 2001 [Bowker's Complete Video Directory](#), 2000 [Celtic Art in Europe](#) Christopher Gosden, Sally Crawford, Katharina Ulmschneider, 2014-08-29 The ancient Celtic world evokes debate, discussion, romanticism, and mythicism. On the one hand, it represents a specialist area of archaeological interest; on the other, it has a wide general appeal. The Celtic world is accessible through archaeology, history, linguistics, and art history. Of these disciplines, art history offers the most direct message to a wider audience. This volume of 37 papers brings together a truly international group of pre-eminent specialists in the field of Celtic art and Celtic studies. It is a benchmark volume, the like of which has not been seen since the publication of Paul Jacobsthal's *Early Celtic Art* in 1944. The papers chart the history of attempts to understand Celtic art and argue for novel approaches in discussions spanning the whole of Continental Europe and the British Isles. This new body of international scholarship will give the reader a sense of the richness of the material and current debates. Artefacts of rich form and decoration, which we might call art, provide a most sensitive set of indicators of key areas of past societies: their power, politics, and transformations. With its broad geographical scope, this volume offers a timely opportunity to re-assess contacts, context, transmission, and meaning in Celtic art for understanding the development of European cultures, identities, and economies in pre- and proto-history. Nominated for Current Archaeology Book of the Year 2016.

**The Power of Stars** Bryan E. Penprase, 2010-10-17 What are some of the connections that bind us to the stars? How have these connections been established? And how have people all around the world and throughout time reacted to the night sky, the sun, and moon in their poetry, mythology, rituals, and temples? This book explores the influence of the sky on both ancient and modern civilization by providing a clear overview of the many ways in which humans have used the stars as an ordering principle in their cultures and which today still inspire us intellectually, emotionally, and spiritually. The book explores constellation lore from around the world, celestial alignments of monuments and temples, both from ancient and modern civilizations, and the role the sky has played in the cultures of the Greek, Egyptian, Babylonian, Native American, Chinese, Mayan, Aztec, and Inca. Models of the universe from each of these cultures are described clearly, and each culture's explanation of the stars, planets, and other celestial objects are described. The roots of astronomy and astrology are presented with original imagery and reproductions of ancient manuscripts that portray the structure of the physical universe as conceived by a diverse array of human cultures over the centuries. Our own scientific Big Bang cosmology and the origin of stars and elements are discussed in a philosophical context to explore how we as modern people learn about the Universe and incorporate the findings of science into our world views. A concluding chapter provides a summary of modern science's
