have made of its inherently inflexible character Chapter four acts as a corrective to this view describing how lawyers and planners have shown remarkable ingenuity in adapting zoning to the demands of a changing society Part 2 deals with the perennial issues of discrimination financing infrastructure for new development and the process for negotiating zoning matters Part 3 presents a discussion of two overlapping issues of increasing significance aesthetics and historic preservation Part 4 focusses on the main issue facing land use planners attempting to channel the forces of development into spatial forms held to be socially desirable Part 5 consists of a series of broad ranging essays which discuss land use planning in the US its institutional and cultural framework and the reasons for its particular character Part 6 discusses the limited possibilities for land use reform in the US drawing on the author s considerable experience in both Britain and Canada in order to interpret the limitations and potentialities of land use planning in the US
