provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists psychometrists remedial teachers and human resource practitioners

### **Individual Differences in Second/Foreign Language Speech Production: Multidisciplinary Approaches and New Sounds** Peijian Paul Sun, Boping Yuan, Xun Yan, Jimin Kahng, 2023-09-01

Second foreign language L2 speech production is a complex process requiring individuals combined efforts to utilize various processing components such as conceptualiser formulator and articulator Since the publication of Pim Levelt's book *Speaking From Intention to Articulation* in 1989 a considerable number of studies have examined L2 speech production in the field of neuroscience with a particular focus on the link between speech perception and speech production Undeniably a neurolinguistic examination of speech production can enrich our understanding of how human brains compute linguistic information at a cognitive level However it is insufficient by only focusing on the neurocognitive dimension of speech production given that individuals speech production can be subject to various individual differences factors either cognitively affectively or socio culturally It is therefore necessary to move beyond the neurocognitive understanding of speech production by taking every possible perspective into consideration Individual difference as an umbrella term covers psychological traits personal characteristics cognitive and emotional components that distinguish learners from each other Given that individual difference factors can reveal disparities in L2 learning and performance among learners such factors have attracted researchers growing interest concerning their influences on L2 speech processing their relationships with L2 speech performance and their contributions to L2 speech development Nevertheless our understanding of L2 speech production is not only insufficient compared to other L2 skills such as writing and reading but also limited to the neurocognitive account of L2 speech production More research therefore is in urgent need to uncover the influence of various individual differences factors on L2 speech production from multidisciplinary perspectives

### **The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements** Fatih Bayram, Maki Kubota, Sergio Miguel Pereira Soares, 2024-03-27

Over the past three decades studies investigating heritage speaker HS linguistic competencies have shown time and again that despite being L1 or 2L1 native speakers of their home language s HS outcomes display variation across a wide spectrum of differences as compared to each other other types of bilinguals as well as their monolingual peers Studies have traditionally used mostly behavioral methodologies rooted in adjacent established fields e.g L1 acquisition adult L2 acquisition offering in addition to documenting and describing HS performance important insights for linguistic theory and challenges related to home minority language maintenance contact policy and more A birds eye view makes it clear that the methodologies one uses to tap into HSs linguistic knowledge areas if

not more are important than the phenomena under investigation especially in light of how their unique experiences with their heritage and other languages are present across a continuum Emergentist Approaches to Language Brian MacWhinney, Vera Kempe, Ping Li, Patricia J. Brooks, 2022-02-16
