

## CHAPTER 01 INTRODUCTION TO OPERATIONS MANAGEMENT

### Teaching Notes

Many students come to this course with negative feelings, perhaps because they have heard that the course includes a certain amount of quantitative material (which many feel uncomfortable with), or perhaps because the course strikes them as "how to run a factory." Others seem to have very little idea about what operations management is. I view the initial meeting with my classes, and this first chapter, as opportunities to dispel some of these notions, and to generate enthusiasm for the course.

Highlights of the chapter include the following:

1. Operations as one of the three main functional concerns of most organizations.
2. The role and job of the operations manager as a planner and decision-maker.
3. Different ways of classifying (and understanding) production systems.
4. System design versus system operation.
5. Major characteristics of production systems.
6. Contemporary issues in operations management.
7. Operations as essentially managerial (planning, staffing, etc.)
8. The historical evolution of production/operations management.
9. Manufacturing operations versus service operations.

### Reading: The Challenges of Managing Services

1. In comparison to manufacturing industry, services have:
  - a. Less structured jobs.
  - b. Higher customer contact.
  - c. Lower worker skills.
  - d. Low skill entry-level positions.
  - e. Higher employee turnover.
  - f. Higher input variability.
2. Because of the factors listed in the answer to question 1, in service industry it is more difficult to control costs and quality resulting in lower productivity. In addition the risk of customer dissatisfaction is greater and employee motivation is lower.

### Reading: Why Manufacturing Matters

1. Since the U.S. economy is becoming more service based, the percentage of employment in manufacturing is declining while the percentage of employment in service industry is increasing. An agile manufacturer is able to switch quickly and economically from one product to another with very little disruption.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a masterful and gripping novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
