**Electronic Distance Measurement** Jean M. Rüeger, 2012-12-06 As the basic principles of EDM instruments have changed little since the third edition of 1990 there was no need for significant changes This edition differs from its predecessor in that it contains corrections of a number of errors and misprints totally revised tables in Appendices D E and F and a new note in Section 2 4 3 on the introduction of the new temperature scale in 1990 The author is indebted to the many readers who reported the many small errors and misprints T Black H Buchanan R Da Col R Kochle P H Lam 1 Nolton 1 R Pollard and A Quade were particularly helpful All known errors have been corrected The assistance provided by most manufacturers or their agents with the updating of the tables with the instrument data was greatly appreciated Sydney February 1996 1 M RUEGER v Preface The book has evolved from the author's continuing teaching of the subject and from two editions of a text of the same title The first edition was published in 1978 by the School of Surveying University of New South Wales Sydney Australia Like its predecessors this totally revised third edition is designed to make the subject matter more readily available to students proceeding to degrees in Surveying and related fields **CONVR 2023 - Proceedings of the 23rd International Conference on Construction Applications of Virtual Reality** Pietro Capone, Vito Getuli, Farzad Pour Rahimian, Nashwan Dawood, Alessandro Bruttini, Tommaso Sorbi, 2023 Within the overarching theme of Managing the Digital Transformation of Construction Industry the 23rd International Conference on Construction Applications of Virtual Reality CONVR 2023 presented 123 high quality contributions on the topics of Virtual and Augmented Reality VR AR Building Information Modeling BIM Simulation and Automation Computer Vision Data Science Artificial Intelligence Linked Data Semantic Web Blockchain Digital Twins Health Safety and Construction site management Green buildings Occupant centric design and operation Internet of Everything The editors trust that this publication can stimulate and inspire academics scholars and industry experts in the field driving innovation growth and global collaboration among researchers and stakeholders Evaluation and Development of Positioning and Monitoring Protocols for Dredged Material Disposal in Puget Sound, 1986 *Evaluation of Survey Positioning Methods for Nearshore Marine and Estuarine Waters* Tetra Tech, Inc, 1986 Field Instrumentation in Geotechnical Engineering Thomas H. for its well preserved skeletons of ungulates and carnivores as well as rare but well preserved remains of primates and other mammals It is considered the reference fauna for the late Villafranchian and MNQ 18 biochronological units of European mammalian evolution but the lack of provenance data made modern research difficult From 2000 2006 the multidisciplinary Franco American Sen ze Research Project undertook five seasons of major fieldwork with the goals of clarifying the age stratigraphy and taphonomy of Sen ze as well as finding additional remains especially of the less well known taxa In this volume following a history of study and summary of the new fieldwork four geological chapters consider field methods stratigraphy volcanology and dating Combining argon argon ages and paleomagnetic calibration the newly recovered fossils are shown to date between 2 20 and 2 08 Ma with concentrations ca 2 20 2 18 and 2 10 2 08 Ma significantly older than previously thought Chapters on palynology ichthyology and ornithology are followed by eight chapters on the fossil mammals The chapter on biochronology places Sen ze among other sites at the start of MNQ 18 which is estimated to end ca 1 7 Ma Of some 2200 specimens known from the site over half are cervids with bovids rhinocerotids and equids far behind According to data from palynology and the habitat preferences of the more common mammals the paleoenvironment around the Sen ze maar would have included forest woodland and grassland perhaps in a warmer and moister climate than today Taphonomic studies revealed that bones often rested a long time under water lacked any indication of carnivore attack and often displayed pathologies in their joints It is likely that most of the associated skeletons were preserved undisturbed after large mammals fell into the paleolake and drowned without being able to climb out This book responds to the long held desire of later Cenozoic paleontologists to see a modern study of a site recognized worldwide as a biochronologic reference for the Plio Pleistocene Our study required renewed fieldwork using up to date techniques of topography sedimentology stratigraphy geochronology and taphonomy The systematic paleontology chapters are based on re study of the entire body of Sen ze fossils collected during more than a century of research The volume will be of interest to paleontologists especially those concerned with the evolution of the European fauna and with the taxa studied as well as with paleoenvironmental reconstruction and biogeography It will also be of value to mammalogists interested in analyses of near modern taxa and to paleoanthropologists archaeologists and taphonomists interested in the methods utilized and the role of Sen ze as a comparative standard for a site of this age without human intervention It will surely be an essential reference for all those who want to know more about Life in Central France Around Two Million Years Ago *Improving Your Field Procedures*
