

The background features a detailed block diagram of an automatic flight control system. It includes a feedback loop with a transfer function $K_0 G_0 + s K_0 G_0$ and a feedback gain K_0 . The error signal e_p is processed by an "Elevator servo" block with transfer function $-G_e$, producing a control signal δ_e . This signal is summed with a feedforward signal δ_T and sent to a "Throttle servo" block. The output of the throttle servo is summed with a reference signal x and fed into the "Airplane dynamics" block. The output of the airplane dynamics block is summed with a feedback signal y to produce the error signal e_p . The diagram also shows several airplane icons flying along a curved path.
