## **Big Catfish Connection:**

**The Catfish Connection** Ronaldo Barthem, Michael Goulding, 1997 The Amazon Basin's rivers, estuaries, and tributaries are home to as many as 1000 species of catfish. In this work, two scientists offer a natural history of the Amazon giant catfish and its central place as a source of food and income within the ecology and economy of the Amazon Basin. While focusing primarily on two species of giant catfish known locally as Dourada and Piramutaba, the authors also present illustrated accounts of 13 distinct large fish. Their research yields strong statistical data and field observations that illustrate the catfishes' extensive migratory range and presents solid evidence of animal species requiring or using a large part of the basin for their ecological needs. *Field & Stream*, 2006-07 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.
