sources of ionizing radiation can lead to human exposure natural sources nuclear explosions nuclear power generation use of  
radiation in medical industrial and research purposes and radiation emitting consumer products Before assessing the  
radiation dose to a population one requires a precise knowledge of the activity of a number of radionuclides The basis for the  
assessment of the dose to a population from a release of radioactivity to the environment the estimation of the potential  
clinical health effects due to the dose received and ultimately the implementation of countermeasures to protect the  
population is the measurement of radioactive contamination in the environment after the release It is the purpose of this  
book to present the facts about the presence of radionuclides in the environment natural and man made There is no aspect of  
radioactivity which has marked the passing century not mentioned or discussed in this book      **Cosmopolitan** ,1993  
Radiological Conditions at Bikini Atoll International Atomic Energy Agency,1998 The general concern about the state of
