Language Acquisition After Puberty Judith R. Strozer, 1994 Bridging the gap between theoretical linguistics and language teaching Judith R Strozer explores what recent theoretical advances suggest about learning a language after childhood and the implications for the design and execution of a foreign language program Strozer outlines clearly in nontechnical language the major concepts of modern language theory from Chomsky s theory of language through the most recent discoveries about the abstract foundations of language She explains ideas about the evolution of a cognitive structure for language in the human brain a language faculty or Universal Grammar that gives humans alone the creative ability to generate the infinite expressions of language This innate universal schema for language endows humankind with a number a very broad principles applicable to all languages Turning to current advances in the theory of phrase structure which has replaced our 2 000 year old rules of grammar with highly abstract universal principles of language structure she relates the latest discoveries about the foundations of language to ideas about how children learn languages A child hearing a specific language can automatically set the parameters for the

rules governing that particular language much like setting a binary switch But our ability to access this innate language mechanism automatically seems limited to childhood until physical maturity somehow changes this brain function Arguing that adults need to learn consciously the systems and structures of another language that children acquire unconsciously Strozer applies these latest theories about the nature of language and how we learn it to the design of foreign language programs for adults She concludes with recommendations for developing a new kind of teaching program that would draw on comparative language research and include new pedagogic approaches Presenting state of the art language theory in easily readable terms and illustrative examples this book will be of interest to everyone interested in the latest understanding of the relationship between the brain and language as well as to all professionals in linguistics and language education The Cumulative Book Index ,1992 A world list of books in the English language A selected and annotated bibliography on English/Spanish cross-linguistic studies, 1980s-1990s Carmen Valero Garcés,1998 **English as a Second Language** ,1993 **Language and Language Behavior Abstracts** ,1980 **Acquisition of the Morphosyntax of NPs in Italian as a Foreign Language** Stefania Morichetti,2004 Paperbound Books in Print ,1992 Language George Melville Bolling,Bernard Bloch,1991 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin **Comparative Romance Linguistics Newsletter** ,1990 **Linguistics and Language Behavior Abstracts** ,1997 **Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff,R R Bowker Publishing,1996-09 *The Proceedings of the ...
