Binchois Studies:

Art Songs of the Burgundian Era, 1415-1480 David Fallows, Emeritus Professor of Musicology David Fallows, 2026-04-10
This volume is a thorough survey of European song in all its richness during key years in the fifteenth century and serves as a guide to the repertory listed in the author's Catalogue of Polyphonic Songs 1415-1480 OUP 1999 The five sections of the book are devoted to musical techniques background survival forms and language repertories with the main thrust being the exploration of how in these sixty-five years the various language groups shared a musical style which was not the case either before or after this period

Citation and Authority in Medieval and Renaissance Musical Culture Suzannah Clark, Elizabeth Eva Leach, 2005 Essays collected in honour of Margaret Bent examining how medieval and Renaissance composers responded to the tradition in which they worked through a process of citation of and commentary on earlier authors Essays in honour of Margaret Bent The chapters of this book probe the varied functions of citation and allusion in medieval and renaissance musical culture At its most fundamental level musical culture relied on shared models for musical practice used by singers and composers as they learned their craft Several contributors to this volume investigate general models which often drew on earlier musical works internalized in the process of composers' own training as singers In written theoretical musical pedagogy conversely citation of authority is deliberate and intentional The adaptation of accepted wisdom in theoretical treatises was the means by which newer authors stamped their own authority Further kinds of citation occur in specific musical texts either within the words set to music or in the music itself The diverse functions of citation and allusion for the creator reader scribe performer and listener are here given due consideration In doing so this volume is a fitting tribute to Margaret Bent whose pedagogy publications and presence are honoured in this Festschrift Contributors SUSAN RANKIN GILLES RICO CHRISTIAN THOMAS LEITMEIR BARBARA HAGGH LEOFRANC HOLFORD STREVENS ANDREW WATHEY KEVIN BROWNLEE ALICE V CLARK LAWRENCE M EARP VIRGINIA NEWES JOHN MILSOM DAVID HOWLETT REINHARD STROHM THEODOR DUMITRESCU CRISTLE COLLINS JUDD BONNIE J BLACKBURN

The Cyclic Mass James Cook, 2019-01-22 England in the fifteenth century was the cradle of much that would have a profound impact on European music for the next several hundred years Perhaps the greatest such development was the cyclic cantus firmus Mass and scholarly attention has therefore often been drawn to identifying potentially English examples within the many anonymous Mass cycles that survive in continental sources Nonetheless to understand English music in this period is to understand it within a changing nexus of two-way cultural exchange with the continent and the genre of the Mass cycle is very much at the forefront of this Indeed the question of what is English cannot truly be answered without also answering the question of what is continental This book seeks initially to answer both of these questions Perhaps more importantly it argues that a number of the works that have induced the most scholarly debate are best seen through the lens of intensive and long-term cultural exchange and that the great binary divide of provenance can in many cases productively be broken down A

great many of these works though often written on the continent can it seems only be understood in relation to English practice a practice which has had and will continue to have major importance in the ongoing history of European Art Music

Music as Social and Cultural Practice Melania Bucciarelli, Berta Joncus, 2007 The linking theme of the essays collected here is the intersection of musical work with social and cultural practice Inspired by Professor Strohm's ideas as is fitting in a volume in his honour leading scholars in the field explore diverse conceptualizations of the work within the contexts of a specific repertory over four main sections Music in Theory and Practice studies the link between treatises and musical practice and analyses how historical writings can reveal period views on the work in music before 1800 Art and Social Process Music in Court and Urban Societies looks at the social and cultural practices informing composition from the late Renaissance until the mid eighteenth century and interrogates current notions of canon formation and the exchange between local and foreign traditions Creating an Opera Industry focuses on how genre and artistic autonomy were defined in operas from diverse eras and countries explaining the role of literature and politics in this process Finally The Crisis of Modernity treats nineteenth century music offering new models for work and context to challenge reigning theories of the meaning of these terms Publisher's website **Binchois Studies** Andrew Kirkman, Dennis Slavin, 2000 A man of huge reputation in his own right and as an alumnus of one of the most sophisticated courts in the history of western Europe the fifteenth century composer Binchois remains for us at the turn of the twenty first century one of the key musical figures of his age Yet in spite of the attention afforded him in the past he remains perhaps more than ever an enigma One of the chief aims of this book surprisingly the first concerned solely with the composer is to attempt to begin to unravel that enigma by viewing him from a variety of contrasting angles In so doing it will also provide a catalyst for further research which will further deepen our understanding not only of Binchois himself but also of the cultural environment of which he was part

Songs, Scribes, and Society Jane Alden, 2010-09-28 A new kind of songbook emerged in the later fifteenth century personalized portable and lavishly decorated Five closely related chansonniers copied in the Loire Valley region of central France c 1465 c 1475 are the earliest surviving examples of this new genre The Loire Valley Chansonniers preserve the music of such renowned composers as Guillaume Du Fay Johannes Ockeghem and Antoine Busnoys But their importance as musical sources has overshadowed the significance of these manuscripts as artifacts in their own right This book places the physical objects at center investigating the means by which they were produced and the broader culture in which they circulated Jane Alden performs a codicological autopsy upon the manuscripts and reveals the hitherto unrecognized role of scribes in shaping the transmission and reception of the chanson repertory Alden also challenges the long held belief that the Loire Valley Chansonniers were intended for royal or noble patrons Instead she argues that a rising class of bureaucrats notaries secretaries and other court officials commissioned these exquisite objects Active as writers and participants in poetry competitions these individuals may even have written some of the chansons texts The unique integration of image text

and music found in chansonniers extends their appeal to a broad readership But for the nineteenth century scholars who rediscovered these manuscripts the larger literary and visual resonances were not of primary interest Alden documents the tangle of motivations national identity populist politics and the rise of the musical masterwork that informed the earliest writings on these books Only now is their multifaceted structure the inspiration for a new generation of readers

St Stephen's Chapel and the Palace of Westminster Tim Ayers, J P D Cooper, Elizabeth Hallam Smith, Caroline Shenton, 2024-10 Traces the history of a magnificent landmark in the history of late medieval art and architecture As the principal royal chapel in the medieval Palace of Westminster St Stephen's was at the centre of worship for the Plantagenets a major collegiate foundation of a new kind for the mid fourteenth century and a community of national significance in the development of sacred polyphony During the Reformation the Chapel was converted into a meeting place for the House of Commons which it remained for 300 years shaping the development of British political culture Its influence continues to be felt today in the design of the Commons chamber Following the disastrous Palace fire of 1834 the site of the upper chapel was rebuilt as St Stephen's Hall a gallery of national history leading to the Central Lobby of the Houses of Parliament This book tells the story of St Stephen's Chapel from the thirteenth century to the present day Sixteen chapters explain the building and its religious life its political significance and the antiquarian rediscovery of its former magnificence Contributors highlight the interaction between visual and political culture the contexts of kingship and international rivalry that informed the foundation and construction of chapel and college the effect of medieval St Stephen's on the development of the House of Commons the adaptation and re use of St Mary Undercroft and the creation of St Stephen's Hall in the 1840s The hall would become a site of Suffragette activism in the campaign for Votes for Women marked today by a monumental artwork New Dawn which is the focus of the final chapter
