Souza, 1996 Computational Methods for Agricultural Research: Advances and Applications do Prado, Hércules
Antonio, Barreto Luiz, Alfredo Jose, Filho, Homero Chaib, 2010-10-31 This book brings computing solutions to ancient practices
and modern concerns sowing the seeds for a sustainable constant food supply utilizing cutting edge computational
techniques Provided by publisher **Population Genetics in the Neotropics** Marcos Vinícius Bohrer Monteiro
Siqueira, Enéas Ricardo Konzen, Pedro Manoel Galetti Junior, 2025-04-23 The Neotropics hold high levels of biodiversity
figuring among the essential hotspots for conservation on Earth Invaluable genetic resources of this biogeographic dominion
must deserve attention of conservationists as well as of breeders This project is aimed at producing a book on population
genetics directed to an audience of undergraduate and graduate students but not limited to those In a distinct approach we
seek to develop a material devoted to population genetics in the Neotropics contextualizing examples of several animal and
plant species belonging to this highly diverse dominion Traditional books available in the subject of population genetics
commonly deal with organisms that are native to North America and Europe while neotropical organisms are lacking in the
context so our book comes forth as an initiative towards covering that Among several subjects this textbook addresses
studies on molecular evolution and phylogenetics genetic structure at broad and fine spatial scales landscape genetics niche
modeling and climate change conservation genetics and quantitative variation and its genetic components in hotspots of
biodiversity such as the Amazon the Brazilian Savanna and the Atlantic Rain Forest It should provide an easy going reading
with the main concepts being presented and contextualized within the Neotropical dynamics of plants and animal populations
Basic mathematical foundations of population genetics theory are provided but no further details on deductions and
advanced algebra are given for the purpose of simplicity The application of the studies on conservation and breeding is also
addressed The chapters were planned to be brief describing the main concepts processes and case studies Invited authors
were encouraged to describe examples from their own research in the Neotropics Altogether this project may offer students
with a textbook with concepts and ideas of the Neotropical genetic diversity bringing awareness and stimulating endeavors
towards the continuance of conservation of endangered species in their environments of origin Green Technologies:
Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2011-03-31 Green
Technologies Concepts Methodologies Tools and Applications assembles the most up to date collection of research results

and recent discoveries in environmental and green technology This comprehensive anthology covers a wide range of topics i
