## Big Of Logos 4:

The Social and Political Thought of Benedict XVI Thomas R. Rourke, 2010-01-05 Covering the entire trajectory of his religious life this meticulously researched book identifies the roots of political and social order in Pope Benedict XVI's philosophy and analyzes his views on the role of Christian faith in politics Although not generally characterized as a political philosopher the Benedict's writings shed significant and unique light on the world of politics today In an age when modern politics has lost sight of its proper relationship within the larger scheme of human affairs and existence Thomas R Rourke shows that as both Pope and the former Cardinal Ratzinger Benedict has made a conscious effort to relate political issues to the broader dialogue on human endeavor ethics and culture Bringing to the fore Benedict's belief on the necessary place of the Christian tradition in a contemporary politics of reason Rourke details the Pope's contribution to solving the deeper problems of politics today A valuable study in political theory and religion this book should be read by those interested in Catholic social and political thought

**The Fish In The Room** M. Eweed, 2025-11-03 You built the killer case flawless logic sexy data slides that could win a corporate beauty pageant And what happened Your customer picked your competitor Or your boss chose his own recycled dusty idea from 2019 Then They explained it with the dumbest reasons you've ever heard So of course you thought I was two seconds away from calling them complete idiots But here's the twist they weren't being stupid they just ordered for themselves and your dish wasn't on the menu This isn't a normal business book It's

what happens when you take behavioral science neuroscience psychology and real business strategy and put them together to answer one simple question how do you actually make people say yes and take action And it s not theory or jargon it s explained with real situations you already know you your boss your customers that colleague whose bad ideas keep getting approved and the real moves entrepreneurs used to turn small ideas into companies everyone now thinks were always going to succeed Because here s the problem what they taught you in business school was expensive fiction Every MBA program every management textbook every consultant deck tells the same fairytale about decision making people spot a problem gather information weigh alternatives and then pick the optimal solution It sounds scientific It sounds professional But it s fantasy Real life doesn t work like that This book speaks neuroscience not business school fiction Your brain actually has two systems making decisions The first is the emotional side your ancient survival processor that s been keeping humans alive for millions of years It s insanely fast reacts in milliseconds and it operates completely outside your awareness It doesn t talk it doesn t do logic it just fires gut reactions based on feelings The second is the analytical side your slow deliberate articulate processor That s the voice in your head that sounds smart and professional It loves weighing options building arguments and writing long explanations for choices you already made Same brain two operating systems So picture it like this a giant ancient fish silent moving toward warm water away from danger following the group that s your emotional system Pure instinct Then picture a well dressed general articulate strategic making plans calculating incentives presenting frameworks speaking in full sentences about optimal outcomes That s your analytical system This whole book is your invitation to accept one uncomfortable truth humans don t buy spreadsheets And by spreadsheets I mean logic evidence numbers data all the rational firepower you thought would finally make them say yes Most of the time it doesn t Not your calculation Not your competitive matrix Not that slide deck you redesigned seventeen times Because what actually decides is the fish not the general So here s what s coming where behavioral economics and psychology finally meet Monday morning business decisions Turn the page and you ll see why your last pitch really failed and why it had nothing to do with the quality of your logic

**Branding the Middle East** Steffen Wippel, 2023-10-04 This edited volume investigates place product and personal branding in the Middle East and North Africa including some studies from adjacent regions and the wider Islamic world. Going beyond simply presenting logos and slogans it critically analyses processes of strategic communication and image building under general conditions of globalisation neoliberalisation and postmodernisation and in a regional perspective of lasting authoritarian rule and increased endeavours for worlding. In particular it looks at the multiple actors involved in branding activities their interests and motives and investigates tools channels and forms of branding. A major interest exists in the entanglements of different spatial scales and in the inconsistencies of communication measures. Attention is paid to reconfigurations of certain images over time and to the positioning of objects of branding in time and space. Historical case studies supplement the focus on contemporary branding efforts. While branding in the Western world and many emerging economies has been meticulously analysed this edited volume fills an important gap in the research on MENA countries.
