Living Minerals Javiera Barandiaran,2026-01-13 A sobering investigation of the rush for lithium for electric vehicles the problematic history of lithium mining and the consequences for sustainability Consumers today are buying electric vehicles with lithium ion batteries motivated by the belief that they are doing good and decarbonizing society But is sustainable lithium extraction possible In Living Minerals Javiera Barandiaran examines the history of lithium mining and uses during the twentieth century with a specific focus on the two oldest brine lithium mines Silver Peak Nevada and Salar de Atacama Chile where lithium is found as one more element in a liquid mix of salts minerals and organisms For six decades mining experts have failed to ask about water usage about waste or brine leakage and about the ecosystem impacts in delicate deserts Instead they have relied on various fictions about the size of reserves the fate of

leaked brine or the value of waste in facilitating mine development These fictions rooted in brine lithium's material qualities could be sustained thanks to powerful mining memories that celebrated resource nationalism Unique in its historical and multidimensional approach to minerals and mining based on the novel Rights of Nature paradigm and using new archival materials from both Chile and the US the book argues that decarbonizing society requires that we reckon with these realities or risk deepening our dependency on an unsustainable mining industry
