

Software Development Life Cycle Big Bang Model

This slide depicts the big bang model of the software development life cycle, including its needed inputs such as time, efforts, and resources.

Developers don't follow a set of guidelines

Development starts with required finances and efforts in the form of inputs

Output may or may not meet the customer's needs because, under this paradigm, even the customer's needs aren't specified

Best suited for short tasks such as academic or practical work

Can be developed by one or two developers working together

Development With A Bang:

Overland Monthly, Devoted to the Development of the Country, 1913 **Ethical Engineering for International Development and Environmental Sustainability** Marion Hersh, 2015-03-20 Ensuring that their work has a positive influence on society is a responsibility and a privilege for engineers but also a considerable challenge This book addresses the ways in which engineers meet this challenge working from the assumption that for a project to be truly ethical both the undertaking itself and its implementation must be ethically sound The contributors discuss varied topics from an international and interdisciplinary perspective including 1 robot ethics 1 outer space 1 international development 1 internet privacy and security 1 green branding 1 arms conversion 1 green employment and 1 deliberate misinformation about climate change Important questions are answered such as 1 what is meant by engineering ethics and its practical implications 1 how decisions made by engineers in their working lives make an impact at the global as well as the local level and 1 what ethics related questions should be asked before making such decisions Ethical Engineering for International Development and Environmental Sustainability will be a valuable resource for practising and student engineers as well as all who are interested in professional ethics especially as it relates to engineering Researchers and policy makers concerned with the effects of engineering decisions on environmental sustainability and international stability will find this book to be of special interest **Methods and Techniques of Ground-water Investigation and Development**, 1966 **Investigation of the Development of the Sentence and the Extent of Vocabulary in Young Children** Madorah Elizabeth Smith, 1926
