assessment and in interventions that focus on correcting environmental deficiencies 3 using stringent criteria of success PBS is effective in reducing problem behavior in one half to two thirds of cases 4 success rates nearly double when intervention is based on a prior functional assessment and 5 consumer needs that emphasize comprehensive lifestyle support long term change practicality and relevance and direct support for consumers themselves are inadequately addressed by the research base Recommendations are made for bridging the research to practice gap Contains more than 300 references Author CR

Severe Learning Disabilities and Challenging Behaviours Eric Emerson, Peter McGill, Jim Mansell, 2013-11-11 This is a timely book The question of how to help people with challenging behaviour and how to design and manage services so that staff families and users feel that what should be done is being done is at the top of the agenda Failure to deal competently with the issue results in disaffection poor quality services and a less than optimal quality of life for service users Moreover the credibility of services for all people with learning disabilities is intimately connected with how we cope with challenging behaviour a point made recently by a Department of Health Working Group chaired by Jim Mansell Department of Health 1993 The book is welcome because it draws together what is known about the important questions from a British perspective although of course most of the underlying issues have world wide relevance The contributors while all having a good deal of experience and authority do not put forward simple portrayals of the problems nor glib solutions and this is one of the book's major strengths Clarity in the field of challenging behaviour is sometimes elusive What is presented here forces the reader to confront arguments in a rational and logical fashion
