Cybercrime and Digital Deviance Roderick S. Graham, Shawn K. Smith, 2024-04-30 Cybercrime and Digital Deviance Second Edition combines insights from sociology criminology psychology and cybersecurity to explore cybercrimes such as hacking identity theft and romance scams along with forms of digital deviance such as pornography addiction trolling and canceling people for perceived violations of norms Other issues are explored including cybercrime investigations nation state cybercrime the use of algorithms in policing cybervictimization and expanded discussion of the theories used to explain cybercrime Graham and Smith conceptualize the online space as a distinct environment for social interaction framing their work with assumptions informed by their respective work in urban sociology and spatial criminology and offering an engaging entry point for understanding what may appear to be a technologically complex course of study The authors apply a modified version of a typology developed by David Wall cybertrespass cyberfraud cyberviolence and cyberpornography This typology is simple enough for students just beginning their inquiry into cybercrime while its use of legal categories of

trespassing fraud violent crimes against persons and moral transgressions provides a solid foundation for deeper study In this edition each chapter includes a new Current Events and Critical Thinking section using concepts from the chapter to explore a specific event or topic like the effect of disinformation on social cohesion and politics Taken together Graham and Smith s application of a digital environment and Wall s cybercrime typology makes this an ideal upper level text for students in sociology and criminal justice It is also an ideal introductory text for students within the emerging disciplines of cybercrime and cybersecurity

Terrorist Minds: From Social-psychological Profiling To Assessing The Risk Sagit Yehoshua,2020-10-19 This book s excellent discussion of the theories and concepts involved in profiling terrorists including those who are incarcerated is a major contribution to the academic discipline on these issues Perspectives on Terrorism

Terrorist Minds From Social Psychological Profiling to Assessing the Risk explores the process of terrorist behavioural analysis from the social psychological profiling of terrorists to the development of risk assessment tools Most of the research for this book was conducted in cooperation with the Intelligence Department of the Israeli Prison Service via qualitative in depth interviews with leaders of terrorist organisations in Israeli prisons Once social psychological profiles were established terrorist risk assessment tools were developed to allow for better observation and practical management of associated problems This book fills the gaps in existing literature on the psychology of imprisoned terrorist group leaders through the analysis of individuals social professional and personal lives as well as their attitudes and perceptions The book also covers the practical aspects of risk assessment based on social psychological profiling and discusses relevant tools that have been developed in recent years It aims to better inform counter terrorism initiatives and policymaking as well as improve methods of communication counter terrorism and conflict resolution

Emotions, Decision-Making and Mass Atrocities Olaoluwa Olusanya,2016-05-06 This book rehumanizes perpetrators of mass atrocities At present a victim perpetrator dichotomy appears to be the dominant paradigm perpetrators have either been mechanistically dehumanized that is perceived as unemotional hard hearted and conforming and thereby lacking the core features of human nature or alternatively they have been animalistically dehumanized In other words they are seen as immoral unintelligent lacking self control and likened to animals Within sociology and criminology the dominant view is that genocide and other mass atrocities are committed by technologically lobotomized perpetrators Somehow the process of rationalization is believed to have transformed these people from emotionally healthy people into hollow soulless shells of human beings or zombies devoid of a full range of normal emotions These people are considered bereft of any ability to reason think or feel yet ambulant and able to respond to surrounding stimuli However it is difficult to imagine crime especially those involving a group of people working together for the duration of a particular criminal activity without emotions For instance there is ample evidence suggesting that both crimes of passion and pre meditated crimes involve emotional arousal Furthermore research in fields such as evolutionary biology psychology and sociology of work and organizations suggest that emotions are essential for

human progress and survival In addition emotions help us make the right call in risky and uncertain situations in other words the majority of real life situations There is therefore a need to revisit existing assumptions around the role of emotions in mass atrocities
