Devonport Built Warships Since 1860 K. V. Burns,1981 *Edwardian Devon 1900-1914* Dr David Parker,2016-08-04 A century ago Britain was locked in a devastating worldwide conflict that would change every aspect of society This book explores life in Devon between 1900 and 1914 offering a revealing glimpse of a world now long vanished before war broke out Devon was no backwater its railways and shipping were busy bringing tourists in and sending vast quantities of produce out It was though a county of contrasts and change Farming had reinvented itself after the late Victorian depression but villages were in decline churches and chapels were full but religion bitterly divided communities the wealthy enjoyed extravagant lifestyles on great estates but their authority was under attack Devon s upper middle and lower class schools perfectly reflected the Edwardian social hierarchy but as the county s elections revealed society was being torn asunder by bitter controversies over exactly who should have the vote rule the country and control the Empire It was a worrying time overseas too Great Britain s supremacy was increasingly challenged and the warships in Devon s harbours and army manoeuvres on the moors drew many comments as the storm clouds began to gather over Europe Using mainly contemporary sources this engaging book examines the attitudes and experiences of people across all social classes in this tumultuous era *Sources for a New Maritime History of Devon* David John Starkey,David Starkey,1987 **Educating the Royal Navy** Harry W. Dickinson,2007-01-25 This volume provides the first comprehensive history of education and training for officers of the Royal Navy in the eighteenth and nineteenth centuries It covers the development of educational provision from the first 1702 Order in Council appointing schoolmasters to serve in operational warships to the laying of the foundation stone of the pre Armed Forces ,1982 Ships Monthly ,1988 Wisdom and War Harry Dickinson,2016-02-11 Opened in 1873 in buildings constructed by Charles II to house retired sailors the Royal Naval College was founded with the aim of providing officers with the highest possible scientific instruction in all branches of study bearing upon their profession For more than 125 years it taught officers ranging in rank from Sub Lieutenants to Vice Admiral providing the technical instruction that equipped a corps of naval architects to build some of the most advanced warships in the world and in later years trained the Royal Navy s nuclear engineers Despite the College s undoubted contribution towards both the education of Royal Navy personnel and technical research more broadly this is the first book to address the history of the institution from its Victorian roots to its closure in the aftermath of the Cold War Taking a chronological approach the book traces the history of the College from its establishment in 1873 a period during which technical training for a steam powered navy was increasingly vital It then shows how during the First World War academic staff at the College made a vital contribution to the development of naval weapons systems and its medical school initiated a vaccine production programme that later produced major improvements in the public health of the nation During the Second World War damaged by enemy action that set London s docklands ablaze the College provided the first taste of naval life for more than 27 000 men and women called from

civilian life to serve on shore and at sea Later chapters conclude with an exploration of the College's post war role focusing particularly on the establishment in 1959 of the Department of Nuclear Science and Technology DNST which ran a nuclear reactor on site until the College was closed in 1998 Both as a history of the Royal Naval College itself and as an exploration of the Navy's attitude toward research and education this book provides a fascinating insight into what is arguably one of Britain's most significant educational establishments
