*A Neuro-Psychoanalytical Dialogue for Bridging Freud and the Neurosciences* Sigrid Weigel, Gerhard Scharbert,2015-08-03 The book presents an overview of the term neuropsychanalysis and traces its historical and scientific foundations as well as its cultural implications It also turns its attention to some blind spots open questions and to what the future may hold It examines the cooperative and conflicted relationship between psychoanalysis and neuroscience Articles from different fields investigate the neurological basis of psychoanalysis as well as the psychological terms of neurology They also discuss what psychoanalysis has to offer neuroscience In addition the emerging neuro psychoanalytical dialogue is enriched here by the voice of a culturally informed history of science The book brings leading authorities on these topics into conversation with each other creating an unprecedented opportunity to better understand the language of the psyche Specific concerns include the discussion of corporeality how the body figures into psychoanalysis the meaning of the unconscious in connection with dreams unconscious fantasies and the field of epigenetics Following a historical perspective the book provides a re reading of Freud s drive theory exploring his concept of life at the threshold of science and culture as well as the relationship between various representations somatic states and the origin of drive Overall the book argues that if the different methodological approaches of psychoanalysis and neuroscience are acknowledged not only for their individual uniqueness but also as a dialectic then the resulting epistemological and methodological dialogue might open up a fascinating body of neuropsychanalytical knowledge

**Narrative Psychology and Vygotsky in Dialogue** Jill Bradbury,2019-09-06 This book draws together two domains of psychological theory Vygotsky s cultural historical theory of cognition and narrative theories of identity to offer a way of rethinking the human subject as embodied relational and temporal A dialogue between these two ostensibly disparate and contested theoretical trajectories provides a new vantage point from which to explore questions of personal and political change In a world of deepening inequalities and increasing economic precarity the demand for free decolonised quality education as articulated by the South African Student Movement

and in many other contexts around the world is disrupting established institutional practices and reinvigorating possibilities for change This context provokes new lines of hopeful thought and critical reflection on discontinuities across historical time theories of social and psychological developmental processes and the practices of intergenerational life particularly in the domain of education for the making of emancipatory futures This is essential reading for academics and students interested in Vygotskian and narrative theory and critical psychology as well as those interested in the politics and praxis of higher education
