## **Development States In East Asia:**

**Developmental States in East Asia** Jack Gray,1988 The book analyses and evaluates the development role and impact of the state in East Asia in both capitalist South Korea and Taiwan and socialist China contexts It makes use of new research data on the mechanisms and impact of state intervention in East Asian development and presents an original theory taking issue with the conventional view that East Asian development reflects the power of market forces Developmental States in East Asia Gordon White,1988-04-21 The book analyses and evaluates the development role and impact of the state in East Asia in both capitalist South Korea and Taiwan and socialist China contexts It makes use of new research data on the mechanisms and impact of state intervention in East Asian development and presents an original theory taking issue with the conventional view that East Asian development reflects the power of market forces *Developmental States* Linda Low,2004 As the Asian crisis triggered or precipitated the meltdown a second objective is to explore the reasons and factors for the breakdown or redundancy of developmental states distinguishing between domestic transformative capacity and external global factors as identified A third objective is to cull experiences and lessons beyond East Asia With many transition economies in Central and Eastern Europe beside China and Indochinese states the theory and practice of developmental states may be a useful bridge These are by no means exhaustive and comprehensive aims questions and issues For individual developmental states covered in this volume country specific lessons may also be drawn for them to be reconfigured to stay relevant The most important consideration for this volume is to value add to the literature both the theory and principles of the Asian developmental state as well as empirical observations observed elsewhere This volume comprises 13 chapters in two parts The Asian Developmental State Yin-wah Chu,2016-04-08 This volume re examines the concept of the developmental state by providing further theoretical specifications undertaking critical appraisal and theoretical re interpretation assessing its value for the emerging economies of China and India and considering its applicability to South Korea and Taiwan Developmental States beyond East Asia Jewellord T. Nem Singh,Jesse Salah Ovadia,2020-05-21 This comprehensive volume reviews recent scholarship regarding the role of the state in economic development With a wide range of case studies of both successful and failed state led development the authors push the analysis of the developmental state beyond its original limitations and into the 21st century New policies institutional configurations and state market relations are emerging outside of East Asia as new developmental states move beyond the historical experience of East Asian development The authors argue for the continued relevance of the developmental state and for understanding globalization and structural transformation through the lens of this approach They further this concept by applying it to analyses of China Latin America and Africa as well as to new frontiers of state led development in Japan and the East Asian developmental states This book expands the scope of research on state led development to encompass new theoretical and methodological innovations and new topics such as governance institution building industrial policy and the role of extractive industries This

book was originally published as a special issue of the journal *Third World Quarterly* *The Political Economy of Developmental States in East Asia* Tian He, 2021 This book explores the variations in the transformation of the Asian developmental state in South Korea Singapore and Taiwan Based on an original theory the author argues that these variations are influenced by two factors industrial structure and democratic transition both of which are shaped by the strategic calculations of the ruling elites to maintain power The theory concerns two concurrent political processes during the state's development process namely the emergence of economic interest groups with varying levels of policy constraints on the state and the process of democratic transition driven by the rise of the middle class The book will appeal to students and researchers in the fields of Asian politics development studies political economy and comparative politics Tian He is a research fellow at Xi'an Jiaotong Liverpool University Suzhou China

**Developmental States** Stephan Haggard, 2018-02-08 The concept of the developmental state emerged to explain the rapid growth of a number of countries in East Asia in the postwar period Yet the developmental state literature also offered a theoretical approach to growth that was heterodox with respect to prevailing approaches in both economics and political science Arguing for the distinctive features of developmental states its proponents emphasized the role of government intervention and industrial policy as well as the significance of strong states and particular social coalitions This literature blossomed into a wider approach firmly planted in a much longer heterodox tradition that explored comparisons with states that were decidedly not developmentalist thus contributing to our historical understanding of long run growth This Element provides a critical but sympathetic overview of this literature and ends with its revival and a look forward at the possibility for developmentalist approaches both in the advanced and developing world

*Dynamics of Local Governance in China During the Reform Era* Tse-Kang Leng, Yun-han Chu, 2010-01-01 Since the Chinese economic reform was realized in the early 1990s a significant revolution has been launched socially economically and politically in China At present China is an indispensable actor in the international arena so that the transitions domestically bring about substantial influence on the whole world *Dynamics of Local Governance in China during the Reform* takes close look at China's current transformation and its broader implications Through their thought provoking essays the contributors to this volume dissect China's transformation by examining various topics in the field of contemporary China studies such as rural industrialization development of civic society socio economic transformation and local self governance

*New East Asian Economic Development* Keun Lee, 1993 In this economic tour de force a talented young Korean scholar trained in the United States and tested in various international fora highlights the dynamism being displayed in East Asia in some of the world's most fascinating economies In this set of interrelated essays Dr Keun Lee of Seoul National University evaluates the development experiences not only of some of the world's fastest growing economies like South Korea Taiwan and more recently China but also contrasts their performances with the more lethargic or hesitant pace in North Korea and the former Soviet Union His theme is that these East Asian economies have a common

feature in the active if not dominant role of the state in setting and implementing economic direction Yet the more dynamic entities have also relied heavily on market interaction as their engine of growth What policy lessons can the slower growing economies learn from their more dynamic neighbors and what are some implications for the global economy from this continuing interaction Dr Lee makes no prediction as to the emergence of a particular doctrine What he sees is that state activism will continue to drive growth in this strategic world region In this economic tour de force a talented young Korean scholar trained in the United States and tested in various international fora highlights the dynamism being displayed in East Asia in some of the world s most fascinating economies In this set of interrelated essays Dr Keun Lee of Seoul National University evaluates the development experiences not only of some of the world s fastest growing economies like South Korea Taiwan and more recently China but also contrasts their performances with the more lethargic or hesitant pace in North Korea and the former Soviet Union His theme is that these East Asian economies have a common feature in the active if not dominant role of the state in setting and implementing economic direction Yet the more dynamic entities have also relied heavily on market interaction as their engine of growth What policy lessons can the slower growing economies learn from their more dynamic neighbors and what are some implications for the global economy from this continuing interaction Dr Lee makes no prediction as to the emergence of a particular doctrine What he sees is that state activism will continue to drive growth in this strategic world region Page 4 of cover Government-Linked Companies and Sustainable, Equitable Development Terence Gomez,François Bafail,Kee-Cheok Cheong,2014-11-27 The debate over how far governments should intervene in economies in order to promote economic growth a debate which from the 1980s seemed settled in favour of the neo liberal non interventionist consensus has taken on new vigour since the financial crisis of 2008 and after Some countries most of them in industrialised Asia have survived the crisis and secured equitable economic growth by adopting a developmental state model whereby governments have intervened in their economies often through explicit support for individual companies This book explores debates about government intervention assesses interventionist policies including industrial and innovation policies and examines in particular the key institutions which play a crucial role in implementing government policies and in building the bridge between the state and the private sector The countries covered include China India South Korea Malaysia and Taiwan together with representative countries from Europe and Latin America Beyond the Developmental State Stephen Chan,Helma Lutz,Danny Lam,2016-07-27 This collection of essays examines the historical influence of states in East Asia s political economies and considers their contributions to the ongoing social economic and political transformation of the countries in this region They show that the status of these so called developmental states have evolved over time and that their role and capacity have been significantly related to the social bases and cultural roots of the relevant countries *The New Development Economics* Jomo K.S.,Ben Fine,2006 This volume provides a critique of the post Washington Concensus in neoliberal economics **The Oxford Handbook of Transformations of the State** Stephan

Leibfried, Evelyne Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges **East Asian Development Model** Shiping Hua, Ruihua Hu, 2014-12-17 Given the impressive growth in East Asia after World War II initially led by Japan the region's development models have been scrutinized since the 1980s The shared Confucian cultural heritage strong government guidance and export led economies were often cited as contributors to the impressive growth However major changes have taken place in Asia on and around the turn of the century Japan experienced two decades of economic slow down while World Bank figures reveal that China is poised to become the largest economy in the world in 2014 overtaking the United States Bearing this in mind is it even possible to formulate an East Asian development model in the context of a shifting twenty first century And if so what is it This book addresses this issue by looking at the economic political and cultural perspectives of China Japan and South Korea focusing on dynamism and potential consensus regarding an East Asian development model The chapters offer a historical background to the East Asian development model as well as in depth case studies of each of the countries concerned to show that whilst the East Asian development model does have distinct characteristics as compared with other areas and other countries may draw some insights from the East Asian experience it is not a panacea that fits all circumstances and fits all times This book will be welcomed by students and scholars of Asian economics Asian politics international political economy and development studies Pacific Forest Sector Outlook Study 2023 Nair, C.T.S., Matta, R., Kumar, R., Lee, S., Thomson, L., 2023-06-19 This outlook study focuses on the Pacific Small Island Developing States SIDS comprising 14 countries in the Pacific region Fiji Papua New Guinea Solomon Islands and Vanuatu Melanesia the Federated States of Micronesia Kiribati the Marshall Islands Nauru and Palau Micronesia and the Cook Islands Niue Samoa Tonga and Tuvalu Polynesia It examines the future prospects for forests and trees in the Pacific providing insights into

potential pathways of change and options for achieving the Sustainable Development Goals SDGs The study was prepared by FAO in response to a request from the Pacific Ministers of Agriculture and Forestry and incorporates information from country outlook papers thematic studies and various published and unpublished sources State Capitalism and Development in East Asia since 1945 ,2023-08-28 During the second half of the twentieth century the countries of East Asia saw one of the most remarkable transformations in human history from relatively poor societies to global powerhouses of accumulation proletarianisation and mega urbanisation This volume features Marxist scholars from East Asia and Europe who are pioneering a new approach to this transformation using the theory of state capitalism The essays analyse the histories of countries on either side of the Cold War divide within the broader framework of twentieth century global capitalist expansion while at the same time offering a sophisticated critique of Developmental State Theory Contributors are Tobias ten Brink Gareth Dale Jeong Seongjin Michael Haynes Kim Ha young Kim Yong uk Lee Jeong goo and Owen Miller

**Globalization, Development and The State** Jørgen Dige Pedersen,2008-08 This book presents the story of how India and Brazil have managed the challenges of economic globalization since 1990 Using an innovative combination of theories of developmental states with theories on the changing nature of global capitalism the analysis presented here explains how India and Brazil have successfully managed those challenges that the opening of their economies has introduced and their different degrees of success The key to their economic performance lies in the establishment of new and more intensive forms of business state collaboration which ensures that policy initiatives have progressively been adapted to the interests and capabilities of the domestic business class The analysis points to a new theoretical perspective on developmental states In an increasingly knowledge intensive global economy developmental states acquire new forms that are more collaborative and democratic in contrast to earlier authoritarian states They also need strong inputs of an intellectual nature making authoritarian solutions less likely to succeed Book cover **Lessons from Growth and Structural Change in the Second-tier South East Asian Newly Industrializing Countries** Jomo Kwame Sundaram,1996 **Developmental Dictatorship and Democratization in South Korea** Won-Ki Hwang,2006 *Developmental States in East Asia* Gordon White,Robert Wade,John Abraham,1984
