## **Developmental Mutants In Higher Plants:**

**Developmental Mutants in Higher Plants** Howard Thomas, Donald Grierson, 1987 *Plant Physiology* 10 F.C. Steward, 2012-12-02 *Plant Physiology A Treatise Volume X Growth and Development* explores the physiology of plant growth and development considering the morphogenesis and morphogenetic systems dormancy environmental cues in plant growth and development plant senescence the role of hormones in growth regulation cell division and growth and development in space This volume is organized into eight chapters and begins with an introduction to morphogenesis as a developmental phenotype emphasizing the cell and the shoot The next chapters cover events in the life of the plant reflecting the importance of the whole plant concept to the subject and the ways in which these events are controlled and integrated into environmental signals and events An experimental approach to a model system for dormancy is described and then the discussion shifts to senescence and death of plants as aspects of plant development This volume also presents a clear and illuminating overview of the major plant growth regulators and their modes of action This book also introduces the reader to cell division and its effect on most major developmental events after fertilization along with the genetic analysis of development and its control by genes The final chapter focuses on the integration of plant growth studies with the technology of space travel which permits analysis of plant behavior in the complete absence of gravity This book is intended for researchers students and specialists in related fields who wish to gain insight on the concepts and research trends in plant growth and development

*Differential Growth in Plants* Peter W. Barlow, 2013-10-22 *Differential Growth in Plants* contains the papers presented at Symposia 2 04 Spatial and Temporal Patterns of Development and 2 14 Movements Based on Differential Flank Growth at the XIV Botanical Congress held in Berlin during July 1987 Organized into 10 chapters this book begins by explaining the differential growth in plants Some chapters follow on the biophysics of differential growth the phototropic behavior of hypocotyls and coleoptiles in connection with the distribution of indole 3 acetic acid and of growth inhibiting substances within them and the differential growth and hormone redistribution in gravireacting maize roots Other topics explained include plant movements caused by differential growth genetic analysis of tropic responses growth and bending of a cylindrical structure in terms of the distribution of relative growth rates and differential growth resulting in the specification of different types of cellular architecture in root meristems This book also elucidates the curving and twinning of stems as well as the spatio temporal analysis of flower ontogenesis

*Biomechanisms Regulating Growth and Development* George L. Steffens, Theron S. Rumsey, 2012-12-06 The Annual Beltsville Symposium provides a forum for interaction among scientists involved in research that is vitally important to agri culture and to the agricultural sciences The Twelfth Symposium in this series focused on the unifying biochemical and physiological mechanisms controlling growth and development of biological systems animals plants insects Unraveling the complex biochemical mechanisms associated with the sequencing of organism growth and development and identifying locating and manipulating key control mechanisms are

essential in utilizing the full potential of biotechnology for improving the composition and quality of agricultural products and the profitability of agriculture Accordingly speakers directed their remarks to basic aspects of biological mechanisms in their area of specialization with consideration given to current status future direction potential impact and limitations to progress The Symposium addressed fundamental questions in Tissue specific gene regulation cell division and differentiation Mechanisms for regulating hormone concentration Hormonal regulation of growth and development Non hormonal regulation of growth and development Nutritional regulation of growth and development Because the backgrounds of the symposium attendees covered a wide spectrum in the basic biological and physical sciences each topic was introduced by a brief overview but general reviews were avoided in favor of findings from on going research projects The symposium brought together a distinguished group of invited scientists from around the world who are leaders Many attendees made poster presentations which increased the exchange of ideas and stimulated informal discussion

Developmental Genetics of Higher Organisms George M. Malacinski,1988 *Programmed Cell Death in Higher Plants* E. Lam,H. Fukuda,J. Greenberg,2000-12-31 The molecular mechanisms which determine whether the cells of a multicellular organism will live or commit suicide have become a popular field of research in biology during the last decade Cell death research in the plant field has also been expanding rapidly in the past 5 years This special volume of Plant Molecular Biology seeks to bring together examples of a diverse array of experimental approaches in a single volume From the differentiation of tracheary elements in vascular plants to the more specialized cell death model of the aleurone in cereals this volume will bring the reader up to date with the characterization of different plant model systems that are currently being studied This endeavor should complement general overviews of plant cell death mechanisms that have been published elsewhere by providing more detailed information on various aspects of this field to interested graduate students and more senior biologists alike

*Molecular Biology of Plant Development* Gareth I. Jenkins,Wolfgang Schuch,1991 This volume is based on papers presented at the 1990 Society for Experimental Biology Symposium and is concerned with the molecular basis of morphogenesis and differentiation in plants Several chapters discuss how a combined genetic and molecular approach involving the isolation and characterization of mutants physical mapping of the genome and chromosome walking is leading to the identification and isolation of genes controlling specific developmental processes Further chapters deal with the use of gene tagging and antisense RNA techniques Much of this research involves Arabidopsis because of its well known advantages for the genetic and molecular analysis of plant development Several chapters describe progress which has been made in the identification of receptors for plant growth regulators the investigation of cellular signalling systems and the study of DNA sequences that interact with specific DNA binding proteins In total the work of approximately twenty internationally renowned laboratories is presented *Gene Structure and Function in Higher Plants* G. M. Reddy,1986 Papers and proceedings of the International Symposium on Gene Structure and Function in Higher Plants *Development*

*Mutants in Higher Plants* H. Thomas, D. Grierson, 1987      Genetics Daniel L. Hartl, Elizabeth W. Jones, 2009 This handbook covers all dimensions of breast cancer prevention diagnosis and treatment for the non oncologist A special emphasis is placed on the long term survivor      **Developmental Mutants in Higher Plants** Howard Thomas, 1987      **Plant Physiology: Growth and development** Frederick Campion Steward, 1959      *Development of a Genetic System for the Study of Gravitropism in Arabidopsis Thaliana* Bertha Lou Bullen, 1992      *Space Life Sciences* Laura L. Bruce, K. Ijiri, Gérald Perbal, 2003      *Hormone Action in Plant Development* Long Ashton Research Station, British Plant Growth Regulator Group, 1987      **Morphogenetic and Physiological Analyses of Two Developmental Mutants of Tomato, Epinastic and Diageotropica** Virginia Marie Ursin, 1987      *Annual Review of Plant Physiology and Plant Molecular Biology*, 1998      **The Molecular Basis of Plant Development** Robert B. Goldberg, 1989      **Aspects fondamentaux et appliqués de la biologie des semences** Daniel Côme, Françoise Corbineau, 1993      **Annual Report** AFRC Institute of Plant Science Research, 1987
