Developmental Systems Insects V 1:

Developmental Systems: Insects S. J. Counce, Conrad Hal Waddington, 1972 Biology of Fertilization V1 Charles Metz, 2012-12-02 Biology of Fertilization Volume 1 Model Systems and Oogenesis is the first in a three volume series that gathers various lines of research about reproduction in general and fertilization in particular Knowledge about cell biology immunobiology biochemistry biophysics and molecular genetics has progressed significantly beyond our understanding of some aspects of fertilization Components of these constitute model systems The present volume includes reviews of such systems some relatively simple model systems in lower organisms sex determining mechanisms and oogenesis The book contains 12 chapters organized into two sections Section I includes studies on evolution reproductive success and immortality of the germ line the structures and mechanisms involved in fertilization problems and fertilization in Paramecium Section II on oogenesis includes studies on gamete differentiation sex determining role of the H Y antigen in mammals and non mammals the mechanism of starfish oocyte maturation meiotic arrest in animal oocytes and the mitotic and meiotic aspects of the mammalian germ cell life cycle *Developmental Systems: Insects* S. J. Counce, Conrad Hal Waddington, 1972 The causal analysis of insect embryogenesis The development of spatial patterns in the integument of insects The imaginal discs of drosophila Role of hormones in insect development The morphogenesis of patterns in drosophila Reproductive Biology of Invertebrates, Accessory Sex Glands, 1993-03-02 Reproductive Biology of Invertebrates Volume III Accessory Sex Glands Edited by K G Adiyodi Accessory Sex Glands is the third volume in the encyclopaedic series and provides very valuable information some hitherto unpublished on the distribution structure origin physiology biochemistry pharmacology and evolution of the accessory sex glands in different groups of invertebrates Volumes I and II of this series published by Wiley have given detailed accounts of the structure origin composition and physiology of female and male gametes and also provided some information on the mechanisms controlling their production The secretions of accessory sex glands are indispensable for several key aspects of gamete physiology and for successful fertilization and development in many internally fertilizing invertebrates Interestingly enough accessory sex gland secretions are produced in some species at least under the influence of gonadotrophic hormones as are the gametes themselves The data on invertebrate accessory sex glands are scattered in various journals and have not been so far collected critically evaluated and published in book form This volume thus fills a void and serves as an indispensable corollary and companion to the two volumes that have already appeared on gametology in the series Contents Series Preface Preface to Volume III Systematic Resume of the Invertebrates Platyhelminthes Turbellaria S S Guraya and V R Parshad Nemertina M Gontcharoff Gnathostomulida Marlene Mainitz Rotifera John J Gilbert Gastrotricha W D Hummon and M R Hummon Nematoda L A Fitzgerald and W Eugene Foor Acanthocephala David W T Crompton Mollusca N W Runham Annelida K G Adiyodi Onychophora Hilke Ruhberg and Volker Storch Arthropoda Crustacea K G Adiyodi and G Anilkumar Arthropoda Insecta Cedric Gillott Arthropoda Myriapoda J M
