## 1st Century Compilers:

*Apollonius of Tyana, the Philosopher-reformer of the First Century A.D.* George Robert Stow Mead, 1901      **Early Chinese Work in Natural Science** Joseph C.Y. Chen, 1996-03-01 This book re-examines the nature of early Chinese work in natural science on the basis of original records analysis and artifacts discovered in recent decades by archaeological explorations of China's past. It presents a concise account of early scientific ideas and thoughts of nature and their effect on the development of natural science. It is suggested that the traditional characterization of early Chinese work in natural science requires substantial modification. The absence of early Chinese participation in the development of modern science is not as commonly assumed a consequence of lacking early scientific tradition in ancient China. It is argued that the concept of inhibitive factors is dubious without taking their dynamical relationships into account and that socio-economical and political influence has to be considered when seeking answers to the major setbacks in science and technology in China. The book also shows that there is no basis for the claims saying that acoustics and astronomy in China have their roots in Babylon.

Two-tone Set-bells Of Marquis Yi Joseph Cheng-yih Chen, W-s Tan, Z-m Shu, 1994-04-20 This book is a collection of papers on the set bells of Marquis Yi to commemorate the 10th anniversary of their discovery. The unearthing of these 5th century bells in 1978 marked one of the most remarkable archeological discoveries in the history of science and technology in Chinese civilization. These bells are two-tone set bells with textural inscriptions and were cast in chromatical scale over a range of 5 1/2 octaves. This collection of papers represents the interdisciplinary research initiated by the discovery of the bells over the past ten years.

**The Scientist in the Early Roman Empire** Richard Carrier, 2017-12-01 In this extensive sequel to *Science Education in the Early Roman Empire*, Dr. Richard Carrier explores the social history of scientists in the Roman era. Was science in decline or experiencing a revival under the Romans? What was an ancient scientist thought to be and do? Who were they and who funded their research? And how did pagans differ from their Christian peers in their views toward science and scientists? Some have claimed Christianity valued them more than their pagan forebears. In fact, the reverse is the case. And this difference in values had a catastrophic effect on the future of humanity. The Romans may have been just a century or two away from experiencing a scientific revolution. But once in power, Christianity kept that progress on hold for a thousand years while forgetting most of what the pagans had achieved and discovered from an empirical anatomy, physiology, and brain science to an experimental physics of water, gravity, and air. Thoroughly referenced and painstakingly researched, this volume is a must for anyone who wants to learn how far we once got and why we took so long to get to where we are today.

*Statistics of Protestant Missionary Societies. 1872-3. [The Compiler's Preface Signed: W. B. B., I.e. William Binnington Boyce.]* W. B. B., 1874      **Sage Tales** Rabbi Burton L.
