The Reich Wreckers: An Analysis Of The 306th Bomb Group During World War II Major Charles J. Westgate III,2015-11-06 This paper presents an analysis of the 306th Bomb Group s contributions during World War II Rather than providing a simple recounting of the various dates and accomplishments the paper analyzes some of the key indicators and statistics of the group s performance In particular the paper focuses on comparing aircraft losses and bombing results of the 306th with the Eighth Air Force s The analysis also examined other areas such as mission aborts enemy aircraft claimed destroyed weather conditions over target bombing methods used presence of fighter escorts and strength of enemy air defenses enemy fighter aircraft and flak The purpose of the analysis was to gain a better understanding of the group s overall performance within the bigger scope of the Eighth Air Force s war effort The analysis was conducted in three steps First the archives of the Air Force Historical Research Agency AFHRA were searched for statistics on the 306th Next similar statistics were collected for the Eighth Air Force Finally the data for the two units was analyzed and compared to aid in determining conclusions To facilitate the last step of the research the air war was divided into four periods The goals and objectives for each period were used as criteria to grade the unit s effectiveness In general the study concluded that the 306th Bomb Group was a typical B 17 bomber group in World War II When comparing the various statistics and graphs provide in this paper we see that in most cases there was little difference in the data for the 306th and the Eighth Air Force However the statistics do not tell the whole story As one of the cadre groups of the Eighth Air Force many of the improvements and lessons learned during the early period of the war were at the expense of the 306th These early lessons and experiments were important and led to the improvements that saved many lives and brought an end to the war Cumulative List of Organizations Described
