Education has changed dramatically in recent years as educational technologies evolve and develop at a rapid pace Teachers and institutions must constantly update their practices and curricula to match this changing landscape to ensure students receive the best education possible 3D printing has emerged as a new technology that has the potential to enhance student learning and development Moreover the availability of makerspaces within schools and libraries allows students to utilize technologies that drive creativity Further study on the strategies and challenges of implementation is needed for educators to appropriately adopt these learning practices The Research Anthology on Makerspaces and 3D Printing in Education considers the benefits these technologies provide in relation to education as well as the various ways they can be utilized in the classroom for student learning The book also provides a review of the difficulties educators face when implementing these technologies into their curricula and ensuring student success Covering topics such as educational technologies creativity and online learning this major reference work is ideal for administrators principals researchers scholars practitioners academicians instructors and students
Interactions on Digital Tablets in the Context of 3D Geometry Learning David Bertolo, 2016-07-14
Over the last few years multi touch mobile devices have become increasingly common However very few applications in the context of 3D geometry learning can be found in app stores Manipulating a 3D scene with a 2D device is the main difficulty of such applications Throughout this book the author focuses on allowing young students to manipulate observe and modify 3D scenes using new technologies brought about by digital tablets Through a user centered approach the author proposes a grammar of interactions adapted to young learners and then evaluates acceptability ease of use and ease of learning of the interactions proposed Finally the author studies in situ the pedagogic benefits of the use of tablets with an app based on the suggested grammar The results show that students are able to manipulate observe and modify 3D scenes using an adapted set of interactions Moreover in the context of 3D geometry learning a significant contribution has been observed in two classes when students use such an application The approach here focuses on interactions with digital tablets to increase learning rather than on technology First defining which interactions allow pupils to realize tasks needed in the learning process then evaluating the impact of these interactions on the learning process This is the first time that both interactions and the learning process have been taken into account at the same time
