**Hypothesis on MATTER** Nainan K. Varghese, 2008-05-09 Hypothesis on MATTER is a revolutionary alternative concept which attempts to explain all physical phenomena related to matter based on just one type of fundamental particle the Quantum of matter These particles form what the author calls 2D energy fields Space is assumed to contain an infinite number of 2D Energy Fields extending in all directions Nainan masterfully explains a wide array of physical phenomena from the origin of matter to gravity and subatomic interactions to cosmological events based on the simple mechanical interactions of quanta of matter There is no more any need to envisage actions at a distance or to invoke irrational assumptions like diversity of forces mass energy

equivalence constancy of light s speed dual nature of electric charge singularities big bang etc This new concept will radically alter our understanding of the physical universe and at the same time explain complex physical phenomena with simple Cause and Effect relationships Advances in Systems, Computing Sciences and Software Engineering Tarek Sobh,Khaled Elleithy,2007-09-27 Advances in Systems Computing Sciences and Software Engineering This book includes the proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 05 The proceedings are a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of computer science software engineering computer engineering systems sciences and engineering information technology parallel and distributed computing and web based programming SCSS 05 was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 05 [www.cisse2005.org](http://www.cisse2005.org) the World s first Engineering Computing and Systems Research E Conference CISSE 05 was the first high caliber Research Conference in the world to be completely conducted online in real time via the internet CISSE 05 received 255 research paper submissions and the final program included 140 accepted papers from more than 45 countries The concept and format of CISSE 05 were very exciting and ground breaking The PowerPoint presentations final paper manuscripts and time schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants so they could choose the presentations they want to attend and think about questions that they might want to ask The live audio presentations were also recorded and were part of the permanent CISSE archive which also included all power point presentations and papers SCSS 05 provided a virtual forum for presentation and discussion of the state of the art research on Systems Computing Sciences and Software Engineering Advances in Sewn Product Technology Anita Mitchell,2024-05-09 The fashion industry continues to contribute significantly to greenhouse gas emissions It is one of the biggest polluters one of the most wasteful of all global industries and is under increasing pressure to address unsustainable practice Emerging out of the pandemic era the fashion industry is also responding to a variety of complex industry challenges such as high return rates customer demand for better fitting apparel faster fashion the drive towards personalisation and greater transparency and sustainability across the value chain These factors along with increasing labour costs are furthermore exerting force on the industry to embrace nearshoring and reshoring Based on extensive primary research involving oral histories methodology with leading industry professionals involved in the innovation of technological and digital solutions for the fashion industry this book presents the latest advances in sewn product technology which offer solutions to many of the fashion industry s current and emerging challenges whilst also informing how these developments are influencing fashion jobs of today and tomorrow This book is therefore of value to fashion students academics researchers and technicians as well as those working within the fashion industry involved in the design development manufacture buying and retail of fashion apparel Features Provides a comprehensive insight into the latest advances in sewing machine

technology including advanced automation and robotics used in the manufacture of fashion apparel Provides a comprehensive insight into the latest industrial sewing threads and needles that can effectively support sustainable design practice Exclusively covers advances in digital technologies to support sustainable practice including advances in 3D body scanning and digital measuring systems recent advances in digital pattern making and pattern design systems recent advances in 3D fashion design software and the latest advances in Product Lifecycle Management PLM systems used within the fashion industry Includes sections on advances in No Sew Seam Bonding and ultrasonic welding technologies Provides an insight into advancements in 3D cloth simulation and prototyping for apparel design and gaming Enables readers to understand the impact of the latest advances in sewn product technology on the jobs of today and tomorrow Case studies that provide working examples of advances in sewn product technology
