Methods, Measures, and Theories in Eyewitness Identification Tasks Andrew M. Smith, Michael P. Toglia, James Michael Lampinen, 2021-02-25 Methods Measures and Theories in Eyewitness Recognition Tasks provides a comprehensive review of the fundamental issues surrounding eyewitness recognition phenomena alongside suggestions for developing a more methodologically rigorous eyewitness science Over the past 40 years the field of eyewitness science has seen substantial advancement in eyewitness identification procedures yet theoretical and methodological developments have fallen behind Featuring contributions from prominent international scholars this book examines methodological and theoretical limitations and explores important topics including how to increase the accuracy of identifying perpetrators when using CCTV images how to create more identifiable facial composites and the differences in accuracy between younger and older eyewitnesses Providing in depth discussion on the limitations of traditional lineups eyewitness memory fallibility and the complications that arise when using laboratory simulations along with suggestions for new methods this book will be an invaluable resource for researchers in eyewitness recognition lawyers players in the criminal justice system members of innocence commissions and researchers with interests in cognitive psychology

Principles of Knowledge Representation and Reasoning Jon Doyle, Erik Sandewall, Pietro Torasso, 1994 The proceedings of KR 94 comprise 55 papers on topics including deduction an search description logics theories of knowledge and belief nonmonotonic reasoning and belief revision action and time planning and decision making and reasoning about the physical world and the relations between KR

The Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions Fabiana Battista, Antonietta Curci, Ivan Mangiulli, Henry Otgaar, 2024-08-02 The fallibility of memory has been often demonstrated A plethora of studies has focused on external influences that can affect memory reports such as suggestive questioning Adopting different paradigms e g misinformation memory conformity the recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced i e commission errors false details In addition suggestion can make them unable to recall truly experienced events or event related details However internal influences can also affect memory One such internal influence is deception In the last decade several studies have investigated how memory can be affected by deception Specifically these studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event This line of research examined the detrimental effects on memory by taking into account different strategies to deceive e g false denials feigned amnesia and fabrication and found that the memory outcomes due to deception can vary based on the strategy used to deceive A number of studies has also demonstrated that another type of deception known as self deception can influence our memory This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories The understanding of the effects of external e g suggestion and internal e g deception self

deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context Memory distortions for example inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions Several studies have underlined the harmful consequences of distorted statements Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases for instance www.innocenceproject.org Therefore it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice
