The system is dependent on plants in grow beds, generally pea gravel being used to filter out fish manure and other material while aerating the water to maintain oxygen levels. *Backyard Aquaponics* is comprised of a book, 2 DVD's, and a CD-ROM and is substantial with plenty of information. The information is presented in a clear way and each chapter leads to the next chapter. Questions that arise while reading generally are answered further on in the text. Once you have successfully been able to

establish your own aquaponics system you will be amazed by how little work is involved in being able to keep and maintain it. The cycling process can take up to three months which can be quite a while to be patient but it is necessary and this wait will ensure the overall success of your aquaponic system moving forward. Think of how much you are going to benefit from being able to grow your own 100% organic crops right where you are and if you choose the right fish to stock you could even have access to regular protein as well.
