Ethics and Law for Chemical, Biological, Radiological, Nuclear & Explosive Crises Dónal P. O'Mathúna, Iñigo de Miguel Beriain, 2019-04-25 This book provides a current analysis of the legal and ethical challenges in preparing for and responding to chemical biological radiological nuclear and explosive CBRNE crises From past events like the Chernobyl nuclear incident in Russia or the Bhopal chemical calamity in India to the more recent tsunami and nuclear accident in Japan or the Ebola crisis in Africa and with the on going threat of bioterrorism the need to be ready to respond to CBRNE crises is uncontroversial What is controversial is whether we are on a path that adequately prepares us for the next event The ethical and legal scholars in this volume hold that much work remains to be done and offer this book to stimulate further reflection and dialogue around CBRNE crises This is an indispensable book for both students and scholars of bioethics international law public health as well as for regulators and administrators developing policy and legislation related to public health planning and emergency responses

Neuroscience and the Future of Chemical-Biological Weapons Malcolm Dando, 2015-07-21 During the last century advances in the life sciences were used in the development of biological and chemical weapons in large scale state offensive programmes many of which targeted the nervous system This study questions whether the development of novel biological and chemical neuroweapons can be prevented as neuroscience progresses

Biological Hazards in Food Maria Schirone, Pierina Visciano, Rosanna Tofalo, Giovanna Suzzi, 2017-03-07 The ingestion of food containing pathogenic microorganisms i e bacteria

and their toxins fungi viruses and parasites can cause food borne diseases in humans A growing number of emerging pathogens changes of virulence of known pathogens and appearance of antibiotic resistance has recently exposed consumers to a major risk of illness Also infected people and the environment can spread microorganisms on raw or processed food Outbreaks of food borne diseases are often unrecognized unreported or not investigated and particularly in developing countries their agents and sources are mostly unknown Surveillance and analytical methods aiming at their detection are to be hoped as well as good strategies to struggle against these threats This E book is subdivided in chapters regarding to pathogenic and spoiling microorganisms chemical hazards produced by biological agents and food safety management systems

Biological Engagement Programs: Reducing Threats and Strengthening Global Health Security Through Scientific Collaboration Jeanne M. Fair, Hillary H. Carter, Nathan Wolfe, 2017-09-13 Biological engagement programs are a set of projects or activities between partner countries that strengthen global health security to achieve mutually beneficial outcomes Engagement programs are an effective way to work collaboratively towards a common threat reduction goal usually with a strong focus on strengthening health systems and making the world a safer place Cooperative programs are built upon trust and sharing of information and resources to increase the capacity and capabilities of partner countries Biological engagement programs reduce the threat of infectious disease with a focus on pathogens of security concern such as those pathogens identified by the U S Government as Biological Select Agent and Toxins These programs seek to develop technical or scientific relationships between countries to combat infectious diseases both in humans and animals Through laboratory biorisk management diagnostics pathogen detection biosurveillance and countermeasure development for infectious diseases deep relationships are fostered between countries Biological engagement programs are designed to address dual use issues in pathogen research by promoting responsible science methodologies and cultures Scientific collaboration is a core mechanism for engagement programs are designed to strengthen global health security including prevention of avoidable epidemics detection of threats as early as possible and rapid and effective outbreak response This Research Topic discusses Biological Engagement Programs highlighting the successes and challenges of these cooperative programs Articles in this topic outlined established engagement programs as well as described what has been learned from historical cooperative engagement programs not focused on infectious diseases Articles in this topic highlighted selected research trainings and programs in Biological Engagement Programs from around the world This Topic eBook first delves into Policies and Lessons Learned then describes Initiatives in Biosafety the core of this work documents Cooperative Research Results from the field then lastly the Topic lays out potential Future Directions to the continued success of the World s cooperative science in reducing the threat of infectious diseases
