Dimensions Of Language Experience:

Dimensions of Language Experience Charlotte B. Winsor,1975 **The Developmental Dimension in Instructed Second Language Learning** Paul Malovrh,James F. Lee,2013-03-28 This work identifies developmental stages in the acquisition of object pronouns by instructed second language learners of Spanish It examines learners ranging from beginner to advanced where the most advanced are themselves teachers of Spanish language courses Study abroad experience is also a variable in the data The book explores language production from a functionalist perspective examining form to function and function to form mappings It provides insights into related developments in production placement and processing of object pronouns Detailed analysis reveals that the most powerful predictor of performance across levels and within levels for each of these is the level of the learner Formal instruction and the study abroad experience is examined both the specific instruction on object pronouns and overall exposure to instruction The Affective Dimension in Second Language Acquisition Danuta Gabryś-Barker,Joanna Bielska,2013-05-03 Affectivity is at the core of everything we do in life Thus its development is also central to learning acquisition and is important for educational contexts The studies presented in this volume consider the different contexts of language learning and examine different types of participants in this process Most of them look at a formal instruction context while others look beyond the classroom and even report on the author s own affectivity and its involvement in learning experiences Affectivity is discussed here in relation to learners but also to teachers in their own professional contexts of teaching foreign languages In the majority of cases affectivity is explored in the case of bilinguals but there are also articles which focus on multilingual language users and their affectivity as an evolving factor

Sinclair,R. J. Jarvella,W. J. M. Levelt,1978-11-15 It is obvious that the growing child manifests an increasing understanding of his language and facility to use it A major part of the child lan guage literature is concerned with the child s developing linguistic and communicative competence Scattered evidence also shows however that children become progressively more aware of language as Zanguage It is interesting to consider in what ways the internal structure and mechanisms of language become more accessible Little is known about linguistic aware ness of this kind the role it plays or how it develops When the new Projektgruppe fUr Psycholinguistik of the Max Planck Gesellschaft was founded the child s conception of language in analogy to Piaget s child s conception of the physical world become one of the research unit s topics of study As previous work on linguistic awareness was largely amorphous we first organized a kind of conference workshop with some of those who had worked in the area The aims of this meeting were to map out the field of study detail the phenomena of interest and define major theoretical issues The meeting took place just after the creation of the project group on May 3 7 1977 The participants were psychologists and linguists who had either published work on metalinguistic issues in child language or who could be expected to contribute substantially to the discussion This book is a direct outcome of that conference though it is not a complete reflection of the papers presented or of the discussion that took place   Dimensions ,1987   Communications Across Cultures Cornelius Lee Grove,1976 Designed for use with teachers and other educators concerned with values education   **The Journal of Speech and Hearing Disorders** ,1989   **Theoretical Issues in Reading Comprehension** Rand J.
