Urban Environmental Stewardship and Civic Engagement Dana R. Fisher, Erika S. Svendsen, James Connolly, 2015-02-11 Once considered the antithesis of a verdant and vibrant ecosystem cities are now being hailed as highly efficient and complex social ecological systems Emerging from the streets of the post industrial city are well tended community gardens rooftop farms and other viable habitats capable of supporting native flora and fauna At the forefront of this transformation are the citizens living in the cities themselves As people around the world increasingly relocate to urban areas this book discusses how they engage in urban stewardship and what civic participation in the environment means for democracy Drawing on data collected through a two year study of volunteer stewards who planted trees as part of the MillionTreesNYC initiative in the United States this book examines how projects like this can make a difference to the social fabric of a city It analyses quantitative survey data along with qualitative interview data that enables the volunteers to share their personal stories and motivations for participating revealing the strong link between environmental stewardship and civic engagement As city governments in developed countries are investing more and more in green infrastructure campaigns to change the urban landscape this book sheds light on the social importance of these initiatives and shows how individuals efforts to reshape their cities serve to strengthen democracy It draws out lessons that are highly applicable to global cities and policies on sustainability and civic engagement

What is Urban Environmental Stewardship? Michele Romolini, 2012 Constructing a framework to convey the layered meanings of stewardship will help to focus and guide future research A cognitive mapping technique was used to elicit responses to the question What is environmental stewardship Semistructured interviews were conducted with representatives of nine Seattle environmental organizations a group of practitioners who collectively represent over 100 years of experience in the field Program planners and managers have particularly direct experiences of stewardship Cognitive mapping enables participants to explore then display their particular knowledge and perceptions about an idea or activity Analysis generated thematic structural representations of shared concepts Results show that the practitioners have multilayered perceptions of stewardship from environmental improvement to community building and from actions to outcomes

Grassroots Stewardship F Stuart Chapin III,2020-06-03 In a society more concerned with how to cope with existential dread than how to make actionable changes to save the planet a surprisingly large number of Americans identify as environmentalists What can individual people do to lessen human impacts on the planet This is not an easy question Most research is focused on large scale changes that go beyond anything an individual can accomplish and people are left feeling defeated rather than inspired to make changes in their everyday lives Change starts at home and F Stuart Chapin III has assembled a book for people who want to learn more about global changes and more importantly what they can do about them starting today Grassroots Stewardship approaches our current situation with an educated sense of hope and positivity This book emphasizes actions by individuals rather than governmental or corporate institutions to trigger transformational change Readers will learn what they can do to most significantly transform their communities and the planet with more sustainable pathways *Meeting Emerging Ecological, Economic and Social Challenges in the Great Lakes Region* Ontario Forest Research Institute,Great Lakes Forest Alliance,2003 This compilation provides summaries of the concurrent session value added forest products environmental education involvement of private landowners in developing strategies for sustainable forest management climate change riparian zone management and maintaining wildlife habitat

Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
