

Towards sustainable management of land and soil

Europe's land and soil face a number of pressures, including urban expansion, contamination from agriculture and industry, soil sealing, landscape fragmentation, low crop diversity, soil erosion and extreme weather events linked to climate change.

Greater cities with cleaner energy and transport systems, a green infrastructure connecting green areas, and extensive sustainable agricultural practices can help make Europe's land use more sustainable and soil healthier.

Land Use Environment And Social Change

William G. Robbins
