**Blueprints for Reform** Project 2061 (American Association for the Advancement of Science), 1998-07-30 Concerned about the lack of science literacy among today's graduating students the American Association for the Advancement of Science compiled reports on the education system aimed at the implementation of specific reforms **BLUEPRINTS FOR REFORM** is a summation of those reports offering a starting point for reforming our education system **A Perspective on Reform in Mathematics and Science Education** Project 2061 (American Association for the Advancement of Science), Floyd James Rutherford, 1996 Designs for Science Literacy American Association for the Advancement of Science, 2001-03-22 The call for science curriculum reform has been made over and over again for much of the twentieth century Arguments have been made that the content of the curriculum is not appropriate for meeting the individual and social needs of people living in the modern world that the curriculum has become overstuffed with topics and does not serve students especially well and above all that the curriculum does not generate the student learning it is expected to produce The latest volume in a continuing series of publications from the AAAS designed to reform science education Designs for Science Literacy presupposes that curriculum reform must be considerably more extensive and fundamental than the tinkering with individual courses and subjects that has been going on for decades Designs deals with the critical issues involved in assembling sound instructional materials into a new coherent K 12 whole The book pays special attention to the need to link science oriented studies to the arts and humanities and also proposes how to align the curriculum with an established set of learning goals while preserving the American tradition of local responsibility for the curriculum itself If fundamental curriculum reform is ever to occur a new process for creating alternatives will have to be developed Designs for Science Literacy provides the groundwork for such a process **Communication and Popularization of Science and Technology in China** Fujun Ren, Jiequan Zhai, 2013-11-12 This book aims to be a reference for researchers studying the promotion of scientific literacy in China as well as a guide for those interested in promoting scientific awareness It covers advances in science and technology communication and popularization practice and research STCP both in China and abroad Theoretical issues are discussed and important problems in promoting scientific and technological awareness are identified e g basic principles structures channels of communication and current needs This book provides a summary of the advances in STCP in China in recent years especially after the issuing of the National Scientific Literacy Outline including STCP resource and capacity building science popularization policies practitioner development infrastructure construction and the development of the science popularization industry as a whole At the same time this book also reviews the design organization monitoring and evaluation of science and technology communication and popularization programs It also highlights current STCP trends and developments in China and calls for a greater emphasis to be placed on research into promoting scientific literacy It is hoped that this book will be useful to readers both in China and abroad by familiarizing

**Stoic Warriors** Nancy Sherman,2005-07-01 Stoic Warriors explores the relationship between soldiers and Stoic philosophy exploring what Stoicism actually is the role it plays in the character of the military both ancient and modern and its powerful value as a philosophy of life Marshalling anecdotes from military history ranging from ancient Greek wars to World War II Vietnam and Iraq Sherman illuminates the military mind and uses it as a window on the virtues of the Stoic philosophy Indeed this is a perceptive investigation of what makes Stoicism so compelling not only as a guiding principle for the military but as a philosophy for anyone facing the hardships of life

**Science for All Americans** F. James Rutherford,Andrew Ahlgren,1991-02-14 In order to compete in the modern world any society today must rank education in science mathematics and technology as one of its highest priorities It s a sad but true fact however that most Americans are not scientifically literate International studies of educational performance reveal that U S students consistently rank near the bottom in science and mathematics The latest study of the National Assessment of Educational Progress has found that despite some small gains recently the average performance of seventeen year olds in 1986 remained substantially lower than it had been in 1969 As the world approaches the twenty first century American schools when it comes to the advancement of scientific knowledge seem to be stuck in the Victorian age In Science for All Americans F James Rutherford and Andrew Ahlgren brilliantly tackle this devastating problem Based on Project 2061 a scientific literacy initiative sponsored by the American Association for the Advancement of Science this wide ranging important volume explores what constitutes scientific literacy in a modern society the knowledge skills and attitudes all students should acquire from their total school experience from kindergarten through high school and what steps this country must take to begin reforming its system of education in science mathematics and technology Science for All Americans describes the scientifically literate person as one who knows that science mathematics and technology are interdependent enterprises with strengths and limitations who understands key concepts and principles of science who recognizes both the diversity and unity of the natural world and who uses scientific knowledge and scientific ways of thinking for personal and social purposes Its recommendations for educational reform downplay traditional subject categories and instead highlight the connections between them It also emphasizes ideas and thinking skills over the memorization of specialized vocabulary For instance basic scientific literacy means knowing that the chief function of living cells is assembling protein molecules according to the instructions coded in DNA molecules but does

not mean necessarily knowing the terms ribosome or deoxyribonucleic acid Science mathematics and technology will be at the center of the radical changes in the nature of human existence that will occur during the next life span therefore preparing today s children for tomorrow s world must entail a solid education in these areas Science for All Americans will help pave the way for the necessary reforms in America s schools ENC Focus ,2000 **Contemporary Issues in Science, Technology and Mathematics Education (STME)** College of Education, Gindiri (Nigeria).
