Food and Nutrition for Athletics: Redefining the Role and Application Xiao Li Shen, Baoming Tian, 2025-04-28

Food and nutrition play crucial roles in athletic performance and overall health. Traditionally, the focus has been on providing athletes with adequate energy and nutrients to support training and competition demands. However, recent advancements in sports science and nutrition research have led to a re-evaluation of the role and application of food and nutrition in athletics. This includes exploring innovative dietary strategies to optimize performance, enhance recovery, and mitigate the risk of injury and illness. Additionally, there is growing recognition of the individualized nature of nutrition requirements among athletes, considering factors such as training load, metabolic demands, and genetic predispositions. As such, redefining the role and application of food and nutrition in athletics is essential for maximizing the potential of athletes and promoting long-term health and well-being.
