MANARESI, 2003-07-21 This book is about mathematics But also about art technology and images And above all about cinema which in the past years together with theater has discovered mathematics and mathematicians It was conceived as a contribution to the World Year on Mathematics The authors argue that the discussion about the differences between the so called two cultures of science and humanism is a thing of the past They hold that both cultures are truly linked through ideas and creativity not only through technology In doing so they succeed in reaching out to non mathematicians and those who are not particularly fond of mathematics An insightful book for mathematicians film lovers those who feel passionate about images and those with a questioning mind **Modeling, Mesh Generation, and Adaptive Numerical Methods for**
