Computer-assisted Structure Elucidation Dennis H. Smith, American Chemical Society. Division of Chemical Information, 1977     *NASA Technical Memorandum*, 1979     **Readings in Artificial Intelligence** Bonnie Lynn Webber, Nils J. Nilsson, 2014-05-12 Readings in Artificial Intelligence focuses on the principles, methodologies, advancements and approaches involved in artificial intelligence. The selection first elaborates on representations of problems of reasoning about actions, a problem similarity approach to devising heuristics and optimal search strategies for speech understanding control. Discussions focus on comparison with existing speech understanding systems, empirical comparisons of the different strategies, analysis of distance function approximation, problem similarity, problems of reasoning about action search for solution in the reduction system, and relationship between the initial search space and the higher level search space. The book then examines consistency in networks of relations, non-resolution theorem proving using rewriting rules for connection graphs to prove theorems, and closed world data bases. The manuscript tackles a truth maintenance system, elements of a plan based theory of speech acts, and reasoning about knowledge and action. Topics include problems in reasoning about knowledge, integration of knowledge and action models, plans, compositional adequacy, truth maintenance mechanisms, dialectical arguments and assumptions, and the problem of control. The selection is a valuable reference for researchers wanting to explore the field of artificial intelligence.     An Automated Structure Elucidation System for MS/MS Data Kevin Patrick Cross, 1985     *Publications of the Planetary Biology Program for 1977: A Special Bibliography*, 1979     50 Years of Chemical Information in the American Chemical Society, 1943-1993 W. Metanomski, 1993     *Annual Reports on NMR Spectroscopy*, 2003-11-13 Annual Reports on NMR Spectroscopy has established itself as a means for the specialist and non-specialist alike to become familiar with new applications of NMR Spectroscopy in all branches of chemistry. Nuclear magnetic resonance (NMR) is an analytical tool used by chemists and physicians to study the dynamics of molecules. Includes comprehensive review articles on NMR Spectroscopy. NMR is used in all branches of science. No other technique has grown to such importance as NMR Spectroscopy in recent years.     **Nuclear Magnetic Resonance: A Review of the Literature published between June 1977 and May 1978** 20000710, 1971     **Nuclear Magnetic Resonance** R J Abraham, 2007-10-31 As a spectroscopic method, Nuclear Magnetic Resonance (NMR) has seen spectacular growth over the past two decades, both as a technique and in its applications. Today the applications of NMR span a wide range of scientific disciplines, from physics to biology to medicine. Each volume of Nuclear Magnetic Resonance comprises a combination of annual and biennial reports which together provide comprehensive coverage of the literature on this topic. This Specialist Periodical Report reflects the growing volume of published work involving NMR techniques and applications in particular NMR of natural macromolecules, which is covered in two reports: NMR of Proteins and Acids, and NMR of Carbohydrates, Lipids, and Membranes. For those wanting to become rapidly acquainted with specific areas of NMR, this title provides unrivalled scope.

of coverage Seasoned practitioners of NMR will find this an invaluable source of current methods and applications Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis
