*Wearable Systems and Antennas Technologies for 5G, IOT and Medical Systems* Albert Sabban, 2020-12-08. Due to progress in the development of communication systems, it is now possible to develop low cost wearable communication systems. A wearable antenna is meant to be a part of the clothing or close to the body and used for communication purposes which include tracking and navigation, mobile computing, and public safety. Examples include smartwatches with integrated Bluetooth antennas, glasses such as Google Glass with Wi-Fi and GPS antennas, GoPro action cameras with Wi-Fi and Bluetooth antennas, etc. They are increasingly common in consumer electronics and for healthcare and medical applications. However, the development of compact, efficient wearable antennas is one of the major challenges in the development of wearable communication and medical systems. Technologies such as printed compact antennas and miniaturization techniques have been developed to create efficient, small wearable antennas, which are the main objective of this book. Each chapter covers enough mathematical detail and explanations to enable electrical, electromagnetic, and biomedical engineers and students and scientists from all areas to follow and understand the topics presented. New topics and design methods are presented for the first time in the area of wearable antennas, metamaterial antennas, and fractal antennas. The book covers wearable antennas, RF measurements, techniques, and measured results in the vicinity of the human body, setups, and design considerations. The wearable antennas and devices presented in this book were analyzed by using HFSS and ADS 3D full wave electromagnetics software. Explores wearable medical systems and antennas. Explains the design and development of wearable communication systems. Explores wearable reconfigurable antennas for communication and medical applications. Discusses new types of metamaterial antennas and artificial magnetic conductors (AMC). Reviews textile antennas. Dr. Albert Sabban holds a PhD in Electrical Engineering from the University of Colorado at Boulder, USA, 1991, and an MBA from the

Faculty of Management Haifa University Israel 2005 He is currently a Senior Lecturer and researcher at the Department of Electrical and Electronic Engineering at Kinneret and Ort Braude Engineering Colleges
