**ABSTRACT**

Nowadays, many classifier methods have been used to classify or categorize human body motions of human posture including the classification of fingers movement. Principal Component Analysis (PCA) is one of classical method that capable to be used to reduce the dimensional dataset of hand motion as well as to measure the capacity of the fingers movement of the hand grasping. The objective of this paper is to analyze the human grasping feature between thumbs, index and middle fingers while grasping an object using PCA-based techniques. The finger movement data are measured using a low cost DataGlove “GloveMAP” which is based on fingers adapted postural movement (or EigenFingers) of the principal component. The fingers movement is estimated from the bending representative of proximal and intermediate phalanges of thumb, index and middle fingers. The effectiveness of the proposed assessment analysis is shown through the experimental study of three fingers motions. The experimental results showed that the use of the first and the second principal components allows for distinguishing between three fingers grasping and represent the features for an appropriate manipulation of the object grasping.

Computer-aided Analysis of Amorite Ignace Jay Gelb,1980 Computer aided is somewhat daunting in books dating from 1980 but the underlying purpose of this book to provide linguistically ordered lists of 6 662 proper names excerpted from Sumerian and Akkadian texts remains useful since most of our knowledge of the non Akkadian Semitic dialect comes from these names

The Amorite Dynasty of Ugarit Mary E. Buck,2019-09-16 In The Amorite Dynasty of Ugarit Mary Buck takes a new approach to the field of Amorite studies by considering whether the site of Ugarit shares close parallels with other sites and cultures known from the Bronze Age Levant When viewed in conjunction the archaeological and linguistic material uncovered in this study serves to enhance our understanding of the historical complexity and diversity of the Middle Bronze Age period of international relations at the site of Ugarit With a deft hand Dr Buck pursues a nuanced view of populations in the Bronze Age Levant with the objective of understanding the ancient polity of Ugarit as a kin based culture that shares close ties with the Amorite populations of the Levant The author covers a contentious area of scholarship with confidence and competence and has produced a convincing case for the Amorite origins of Bronze Age Ugarit Nick Wyatt *Journal for the Study of the Old Testament* 44 5 2020 The *Studies in the Archaeology and History of the Levant* series publishes volumes from the Harvard Museum of the Ancient Near East Other series offered by Brill that publish volumes from the Museum include Harvard Semitic Studies and Harvard Semitic Monographs <https://hmane.harvard.edu/publications>

**The Interpretation of the Hebrew Word אָמָר (People) in Samuel-Kings** Luke Emehiele Ijezie,2006 This study of the word people in the biblical context touches one of the central issues of biblical literature The author addresses the semantic and literary critical problems involved in interpreting the Hebrew word within the complex texts of 1 2 Samuel and 1 2 Kings While the word is often rendered by the English word people and its cognates in the modern languages it is also shown that the idea of people together with its semantic range in the modern usage is not identical to the ancient Hebrew Concerted effort is thus made to identify the basic factors and patterns that explain its meaning in various Hebrew contexts The study explains how expresses both Israel s identity as a secular polity as well as its identity as a religious entity The discussion is carried out in the light of a number of chosen texts and these are analyzed both synchronically and diachronically

[A Glossary of Old Syrian](#) Joaquin Sanmartín, 2019-04-08 A Glossary of Old Syrian is the first of two volumes aimed at the completion of a lexicographical index of the Old Syrian linguistical continuum This glossary gives a picture or map of the Old Syrian lexicon as it can be extracted and reconstructed from the available sources from the Old Akkadian Eblaitic through the Old and Middle Babylonian corpora Old Syrian can be defined most appropriately as a diachronically conservative geographically pluricentric and pragmatically multilayered linguistic cluster Therefore the present work pays special attention to the distribution of lexical data along diatopic and diastratic criteria In view of the enormous amount of material and the dispersion of the data this glossary focuses on the most representative textual corpora of the Old Syrian linguistic landscape The bibliographical references are kept deliberately succinct and as a rule restricted to the classic works that may be easily found in every Assyriological or Semitic library public or private and that will redirect the users to their sources Since the Old Syrian lexicography remains uncertain the leading interpretative opinions are included alongside the most relevant comparative Semitic material A Glossary of Old Syrian offers a clear picture of the current state of this field and is intended to serve as a reference work in support of future study
