Computing in the Middle Ages Severo M. Ornstein,2002-11-01 NULL   *Computing in the Middle Ages* Severo M. Ornstein,2002 This is the story of a young boy and some of his experiences growing up in the Southern part of the United States in the 40 s and 50 s of this twentieth century It includes some accounts of incidents that are deeply filled with pathos and sadness However in contrast it climbs the heights of happiness and unfettered joy of the carefree days of southern culture It is not only his story but the interactions of parents siblings and other kin and also the rare to this age endearing educational and just simple fun of grandparents and even great grandparents The scope is wide and yet focused enough to enable one to become familiar with the people and places in a personal way History biography humor entertainment it is all of the above   **Computing in the Middle Ages** Severo M. Ornstein,2002 Computing in the Middle Ages is designed for the lay reader who wishes to understand some of the background of the computer revolution It provides an easily understood and amusing account of what took place in computer research between the 1950s and the 1980s from publisher description

Algorithms, Monks, and Merchants Hb Giorgio Ausiello,2025 This book explores the tight relationship that existed between application needs and computational problem solving methods during the Middle Ages particularly the period between the 9th and 15th centuries It was a time of great cultural and economic evolution starting with the blooming phase of Arab science and continuing with the acquisition of Hindu Arabic computation methods based on the decimal positional number system in Western Europe The aim is to show by means of suitable examples how in the Middle Ages mathematics and computation were tightly related to the solution of everyday life problems These ranges from religious problems like computing the date of Easter to land measurement and financial computations as well as handling various volumes and managing agricultural resources In particular during the late medieval centuries when the economy saw a substantial upswing merchants activity required strong computational skills to solve a great variety of problems It is such need that led to the creation of the so called abacus schools that the sons of merchants primarily Italians but also from other European regions attended during their boyhood to learn computing techniques   **Algorithms, Monks, And Merchants: Computing In Everyday Life In The Middle Ages** Giorgio Ausiello,2025-02-25 This book explores the tight relationship that existed between application needs and computational problem solving methods during the Middle Ages particularly the period between the 9th and 15th centuries It was a time of great cultural and economic evolution starting with the blooming phase of Arab science and continuing with the acquisition of Hindu Arabic computation methods based on the decimal positional number system in Western Europe The aim is to show by means of suitable examples how in the Middle Ages mathematics and computation were tightly related to the solution of everyday life problems These ranges from religious problems like computing the date of Easter to land measurement and financial computations as well as handling various volumes and managing agricultural resources In particular during the late medieval centuries when the economy saw a
