A First Course in Combinatorial Optimization Jon Lee, 2004-02-09 A First Course in Combinatorial Optimization is a text for a one semester introductory graduate level course for students of operations research mathematics and computer science It is a self contained treatment of the subject requiring only some mathematical maturity Topics include linear and integer programming polytopes matroids and matroid optimization shortest paths and network flows Central to the exposition is the polyhedral viewpoint which is the key principle underlying the successful integer programming approach to combinatorial optimization problems Another key unifying topic is matroids The author does not dwell on data structures and implementation details preferring to focus on the key mathematical ideas that lead to useful models and algorithms Problems and exercises are included throughout as well as references for further study

Heroux,Padma Raghavan,Horst D. Simon,2006-01-01

Parallel processing has been an enabling technology in scientific computing for more than 20 years This book is the first in depth discussion of parallel computing in 10 years it reflects the mix of topics that mathematicians computer scientists and computational scientists focus on to make parallel processing effective for scientific problems Presently the impact of parallel processing on scientific computing varies greatly across disciplines but it plays a vital role in most problem domains and is absolutely essential in many of them Parallel Processing for Scientific Computing is divided into four parts The first concerns performance modeling analysis and optimization the second focuses on parallel algorithms and software for an array of problems common to many modeling and simulation applications the third emphasizes tools and environments that can ease and enhance the process of application development and the fourth provides a sampling of applications that require parallel computing for scaling to solve larger and realistic models that can advance science and engineering **Integer Programming** ,2005 RAIRO ,2007
