Architecture's New Media Yehuda E. Kalay,2004 A comprehensive examination of computer aided architectural design and its potential effect on architectural design practice for practitioners educators students and researchers Computer aided design CAD technology has already changed the practice of architecture and it has the potential to change it even more radically With *Architecture's New Media* Yehuda Kalay offers a comprehensive exposition of the principles methods and practices that underlie architectural computing He discusses the aspects of information technology that are pertinent to architectural design analyzes the benefits and drawbacks of particular computational methods and looks at the potential of emerging computational techniques to affect the future of architectural design CAD technology introduced in the postwar era and adopted in everyday architectural practice beginning in the 1970s is now so indispensable that as William Mitchell observes in his foreword architectural practice without it is as unimaginable as writing without a word processor Yet Kalay argues it has had little qualitative effect This book provides a detailed introduction for practitioners educators students and researchers to aspects of CAD that go beyond the improvements in drafting modeling and rendering for which it is commonly used Computer aided architectural design CAAD is capable of modeling and manipulating objects not merely their graphical representations reasoning about and predicting performance of design solutions generating new design solutions through algorithmic and other methods managing vast amounts of information and taking advantage of opportunities offered by the Internet for collaboration across time and space and for design of the virtual space of the Internet itself *Architecture's New*
