

Network Project Proposal

In this project, you are the consulting firm that will be creating a proposal to implement networking technology for a business. You will create a fictional or real business that is in need a new network. The project will be built from nothing (no current equipment can be implemented). The business must have at least two locations that are 30 or more miles apart and a minimum of 30 employees. The customer requires a Linux web server, and a Windows Active Directory implementation.

In your executive summary, you will need to explain the business, locations, and the needs assessment.

This is what they want:

1. Web Presence, with web sales
2. Internet access for general areas
3. Intranet:
 - a. Access between sites
 - b. Owner access from home
4. E-mail
5. Wireless access at all sites
6. **For a Retail business:** Implementation of on-line inventory tracking system that will automatically update inventory quantities from cash register sales. Inventory at any location is accessible by the other location. All bookkeeping and payroll is completed in-house. Customers need online access to order and check status of orders. Or
For a Manufacturing business: Online manufacturing raw material inventory, production cycle and order status system. All Bookkeeping and payroll is completed in-house. Salespeople travel within the US. Customers need online access to order and check status of orders. Or
For a Restaurant: Order processing software with inventory system. All bookkeeping and payroll is completed in-house. Or
For a Shipping company: Package tracking system, remote update. All bookkeeping and payroll is completed in-house. Employees travel within the US. Customers need online access to schedule pickup and check status of items. Or
Specific needs of the company – contact me if you choose a different sort of business.

NOTE: The above items must be addressed, even if you recommend they NOT be implemented – explain your reasoning.

The minimum proposal will include:

- **Table of Contents**
- **Executive Summary:** A concise statement of the project, benefit, and scope geared for the non-technical person to read and understand. Where the company currently is, where they want to be and what benefits the company can expect should they choose to invest in technology and accept your proposal.
- **Detailed analysis of Business, Technical, and Security requirements.** Depending on the type of business you are providing services to, you will need to consider different designs to compliment and assist the business to be efficient and provide a payoff for the technology they implement.

Network Proposal Guide

Tobias Bleicker

Network Proposal Guide:

The book delves into Network Proposal Guide. Network Proposal Guide is a vital topic that needs to be grasped by everyone, ranging from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Network Proposal Guide, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:
 - Chapter 1: Introduction to Network Proposal Guide
 - Chapter 2: Essential Elements of Network Proposal Guide
 - Chapter 3: Network Proposal Guide in Everyday Life
 - Chapter 4: Network Proposal Guide in Specific Contexts
 - Chapter 5: Conclusion
2. In chapter 1, this book will provide an overview of Network Proposal Guide. This chapter will explore what Network Proposal Guide is, why Network Proposal Guide is vital, and how to effectively learn about Network Proposal Guide.
3. In chapter 2, this book will delve into the foundational concepts of Network Proposal Guide. The second chapter will elucidate the essential principles that need to be understood to grasp Network Proposal Guide in its entirety.
4. In chapter 3, the author will examine the practical applications of Network Proposal Guide in daily life. This chapter will showcase real-world examples of how Network Proposal Guide can be effectively utilized in everyday scenarios.
5. In chapter 4, this book will scrutinize the relevance of Network Proposal Guide in specific contexts. The fourth chapter will explore how Network Proposal Guide is applied in specialized fields, such as education, business, and technology.
6. In chapter 5, the author will draw a conclusion about Network Proposal Guide. The final chapter will summarize the key points that have been discussed throughout the book.

The book is crafted in an easy-to-understand language and is complemented by engaging illustrations. It is highly recommended for anyone seeking to gain a comprehensive understanding of Network Proposal Guide.
