Germany Since 1815:

A History of Modern Germany Since 1815 Frank Tipton, 2003-01-01 Germany continues to fascinate us into the twenty first century because unlike the history or national existence of other European states its very being has been posed as a question Why was there no unified German state until late in the nineteenth century How did Germany become an industrial power What responsibility does Germany bear for the two World Wars This accessible but authoritative study attempts to answer these and other fundamental questions through looking at the economic social political and cultural forces which have created modern Germany The 1848 revolutions ushered in an age of Realism which saw rapid economic development and the creation of the Bismarckian empire However by the early twentieth century Germany s economic expansion and position as a world power began to fracture and growing internal economic social and political contradictions led it with disastrous results into the First World War and the subsequent Weimar Republic Hitler and the Nazi movement proposed a revolution and the creation of a German style and the Second World War Holocaust is arguably the defining event of the twentieth century The Americanization of the German economy and society the economic miracle and euphoria of reunification have in recent years rapidly given way to disillusionment as the major political parties have failed to master outstanding social and environmental problems The German question Germany s place within the European Union continues to be unanswered even within an EU where it is the dominant economic power *Germany Since 1789* David G.

a subject traditionally in the domain of history Peter J Katzenstein analyzes Austro German relations since 1815 in six chronologically arranged case studies Asking why these partners remain disjointed Katzenstein finds the answer in the persistence of Austria's political autonomy In an appendix the author illustrates how this type of analysis could be extended to include an examination of the unification of Germany and of Italy in the middle of the nineteenth century and of the fragmentation of Sweden Norway and England Ireland at the beginning of the twentieth His study sheds new light on the reasons for the continued political autonomy of nation states Disjointed Partners derives from the author's dissertation which was awarded the Charles Sumner Prize at Harvard and the American Political Science Association's Helen Dwight Reid Award for the best dissertation of the year in the field of international relations law and politics This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1976 *The Course of German History; a Survey of the Development of Germany Since 1815*, by A.J.P.
