Solidarity Economy and Social Business Noriatsu Matsui,Yukio Ikemoto,2015-02-05 This book presents theoretical examinations of why and how connecting people yields different results from those of the market mechanism alone With an ever greater disparity between the world s rich and poor actions have been taken to remove the imperfections and remedy malfunctions of the market mechanism An underlying theme of these activities is to connect people and make them directly visible to one another thus the integrating concept of the solidarity economy emerges This volume analyzes diverse examples and practices of solidarity economy Adam Smith emphasized the importance of sympathy among people and the role of the impartial spectator in order to control otherwise reckless markets These major concepts form the basis of a solidarity economy The examples and practices in this book are based on this framework The first is the idea of social business promoted by Prof M Yunus of the Grameen Bank Although the group of five members in the Grameen Bank organization is considered a system of mutual surveillance by some economists it is not a system based on distrust but a mechanism for mutual help and encouragement Also examined in this book is organic agriculture which adheres to the necessity of face to face relationships It pursues environmental concerns and food safety by bringing together consumers and producers in local areas and by sharing knowledge When consumers and producers are widely separated a system of certification assures consumers that no chemical pesticides and fertilizers are used Connecting consumers and producers through certification systems can be seen as part of fair trade mechanisms These mechanisms are applied in certified coffee programs for instance to reduce poverty to protect the environment and to safeguard human rights This book proposes that all these seemingly different types of activities can be understood as part of the solidarity economy With this unifying theme the book will be useful for both theoretical investigations and practical applications
