

FORCES AND MOTION

READING COMPREHENSION WORKSHEET

<p>Fill in the blank with the correct word or phrase.</p> <ol style="list-style-type: none"> The equation that shows force, mass, and acceleration is _____. When a net force acts on an object, the object's motion _____. The force that opposes motion between two surfaces in contact is _____. The resistance of an object to change in motion is called _____. A force that causes an object to change its velocity is called _____. <p>Draw lines to match each term on the left with the correct definition on the right.</p> <ol style="list-style-type: none"> Force Mass Acceleration Velocity Newton <p>Write complete answers to each question.</p> <ol style="list-style-type: none"> What is a net force? <p>_____</p> <ol style="list-style-type: none"> How does increasing an object's mass affect its acceleration? <p>_____</p> <ol style="list-style-type: none"> Describe an example of an object with different forces acting on it. <p>_____</p> <ol style="list-style-type: none"> Why does increasing the force applied to an object increase its acceleration? <p>_____</p> <ol style="list-style-type: none"> How does a net force cause an object to change its motion? <p>_____</p> <p>Complete an essay that thoroughly addresses the following question.</p> <ol style="list-style-type: none"> Explain how forces and motion determine the velocity of an object. 	<p>Mark each statement as True or False.</p> <ol style="list-style-type: none"> Gravitational force is a type of contact force. <ol style="list-style-type: none"> True False Friction is a contact force. <ol style="list-style-type: none"> True False How often does a net force on an object accelerate it? <ol style="list-style-type: none"> Never Always Sometimes Only when the object is at rest. Newton's second law states that acceleration is directly proportional to net force. <ol style="list-style-type: none"> True False Gravity is a contact force. <ol style="list-style-type: none"> True False Acceleration is a vector quantity. <ol style="list-style-type: none"> True False Applying more force to an object will cause it to accelerate more. <ol style="list-style-type: none"> True False An object's acceleration is directly proportional to the net force applied to it. <ol style="list-style-type: none"> True False Newton's second law states that acceleration is directly proportional to net force. <ol style="list-style-type: none"> True False An object's acceleration is directly proportional to the net force applied to it. <ol style="list-style-type: none"> True False Gravity is a contact force. <ol style="list-style-type: none"> True False Acceleration is a vector quantity. <ol style="list-style-type: none"> True False Applying more force to an object will cause it to accelerate more. <ol style="list-style-type: none"> True False An object's acceleration is directly proportional to the net force applied to it. <ol style="list-style-type: none"> True False 	<ol style="list-style-type: none"> What happens when the net force on an object is zero? <ol style="list-style-type: none"> The object changes direction. The object stays still. The object accelerates. The object continues moving in the same direction at the same speed. Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which force is not a contact force? <ol style="list-style-type: none"> Normal force Frictional force Gravitational force Applied force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force 	<p style="text-align: center;">Forces and Motion</p> <hr/> <p>Read the passage carefully before answering the questions that follow.</p> <div style="border: 1px solid black; padding: 10px;"> <p>There are different ways that forces can cause an object to change its motion. When a net force acts on an object, the object's motion will change. This means that the object's speed or direction will change. However, if the net force is zero, the object's motion will not change. This means that the object's speed and direction will remain the same. This is called Newton's first law of motion.</p> <p>Another important concept is acceleration. Acceleration is the rate at which an object's velocity changes. This means that if an object is accelerating, its speed or direction is changing. This is called Newton's second law of motion. The acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. This means that if you apply a larger force to an object, it will accelerate more. Conversely, if you apply a smaller force to a larger object, it will accelerate less.</p> <p>Forces can also cause an object to change its shape. This is called deformation. For example, if you push on a ball, it will change shape. This is because the forces are not balanced. The ball is being pushed in one direction, so it will change shape. This is called Newton's third law of motion. For every action, there is an equal and opposite reaction. This means that if you push on an object, the object will push back on you with an equal and opposite force.</p> </div> <p>Answer the questions that follow.</p> <ol style="list-style-type: none"> What does Newton's first law of motion state? <ol style="list-style-type: none"> An object at rest stays at rest. An object in motion stays in motion with the same speed and in the same direction unless acted upon by an unbalanced force. An object's motion will change if a net force acts on it. An object's motion will change if a net force acts on it. What does Newton's second law of motion state? <ol style="list-style-type: none"> The acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. The acceleration of an object is directly proportional to its mass and inversely proportional to the net force acting on it. The acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. The acceleration of an object is directly proportional to its mass and inversely proportional to the net force acting on it. What does Newton's third law of motion state? <ol style="list-style-type: none"> For every action, there is an equal and opposite reaction. For every action, there is an unequal and opposite reaction. For every action, there is a net force. For every action, there is a net force. What does Newton's third law of motion state? <ol style="list-style-type: none"> For every action, there is an equal and opposite reaction. For every action, there is an unequal and opposite reaction. For every action, there is a net force. For every action, there is a net force. <div style="text-align: right;">  </div>

Science Review Forces Section Answer Key Introduction

Science Review Forces Section Answer Key Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Science Review Forces Section Answer Key Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Science Review Forces Section Answer Key : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Science Review Forces Section Answer Key : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Science Review Forces Section Answer Key Offers a diverse range of free eBooks across various genres. Science Review Forces Section Answer Key Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Science Review Forces Section Answer Key Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Science Review Forces Section Answer Key, especially related to Science Review Forces Section Answer Key, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Science Review Forces Section Answer Key, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Science Review Forces Section Answer Key books or magazines might include. Look for these in online stores or libraries.
