Abramson,Neil Gong,2020 The social sciences have seen a substantial increase in comparative and multi sided ethnographic projects over the last three decades Yet at present researchers seeking to design comparative field projects have few scholarly works detailing how comparison is conducted in divergent ethnographic approaches In *Beyond the Case* Corey M Abramson and Neil Gong have gathered together several experts in field research to address these issues by showing how practitioners employing contemporary iterations of ethnographic traditions such as phenomenology grounded theory positivism and interpretivism use comparison in their works The contributors connect the long history of comparative and anti comparative ethnographic approaches to their contemporary uses By honing in on how ethnographers render sites groups or cases analytically commensurable and comparable *Beyond the Case* offers a new lens for examining the assumptions payoffs and potential drawbacks of different forms of comparative ethnography      [Conservatism: A Cultural-Psychological Exploration](#) Enno Freiherr von Fircks,2024-02-23 The present work discusses the phenomenon of conservatism from a qualitative cultural psychological perspective As such the text breaks with current mainstream research about political ideologies wanting to assess a political culture within the simple administration of a questionnaire The SpringerBrief will oppose such a perspective trying to assess how the conservative minded person will structure space and time in peculiar ways In the first part of the study participants were invited to reflect about how they preserve or conserve meaning in various activities whereas the second part of the study tried to shed light onto how something preservable or conservable comes into being and what it actually makes it preservable Here an autoethnographic study revealed that something becomes meaningfully preservable when it satisfies multiple demands of the Self as well as of the environment Readers will realize the insufficiency of the positivistic attitude analyzing conservatism from a simple quantitative perspective and researchers are shown how political ideologies or cultures can be assessed ecologically something that has not yet been undertaken This leads to an appeal for scientists to study the phenomenon of conservatism more wholistically      **Seeing the Light** Thomas DeGloma,2014-11-26 The chorus of the Christian hymn *Amazing Grace* reads I once was lost but now am found Was blind but now I see Composed by a minister who formerly worked as a slave trader the song expresses his experience of divine intervention that ultimately caused him to see the error of his ways This theme of personal awakening is a feature of countless stories throughout history where the lost and the blind are saved from darkness and despair by suddenly seeing the light In *Seeing the Light* Thomas DeGloma explores such accounts of personal awakening in stories that range from the discovery of a religious truth to remembering a childhood trauma to embracing a new sexual orientation He reveals a

common social pattern When people discover a life changing truth they typically ally with a new community Individuals then use these autobiographical stories to shape their stances on highly controversial issues such as childhood abuse war and patriotism political ideology human sexuality and religion Thus while such stories are seemingly very personal they also have a distinctly social nature Tracing a wide variety of narratives through nearly three thousand years of history Seeing the Light uncovers the common threads of such stories and reveals the crucial little recognized social logic of personal discovery
