of organizing over the last decade Firms are more dependent than ever on the need for continuous and radical innovations and often innovations that go beyond their existing businesses This challenges firms in terms of knowledge and idea sharing and often necessitates the need to expand beyond the boundaries of the single firm for multi party collaboration to meet serious challenges and develop creative solutions Drawing from the Fourth International Workshop on Organization Design and featuring contributions from an international array of specialists this volume focuses on the expansion beyond the boundaries of the single firm and multi firm networks to include for example community based organization designs A community is a connected set of firms the connections can take on many different dimensions For organization design theory community based organizations have many implications For one organization design theory has to identify and describe designs that enhance collaborative behavior among firms without restricting the ability of the individual firm to continue to compete within its own marketplace Moreover organization design theory also has to identify and describe information processing strategies and designs that allow the continuous generation sharing and application of existing information and knowledge The development of effective collaborative community designs is critically important to the global economy because increasingly our future depends on pursuing shared goals and sustainably developing our global commons Ideally the ideas and findings in this book will contribute to increased attention to new organization designs capable of meeting 21st century opportunities and challenges
