Antiquarian Literature in the Sixteenth Century Joan Carbonell Manils, Gerard González Germain, 2024-07-01 During the sixteenth century antiquarian studies the study of the material past comprising modern archaeology epigraphy and numismatics rose in Europe in parallel to the technical development of the printing press Some humanists continued to prefer the manuscript form to disseminate their findings as numerous fair copies of sylloges and treatises attest but slowly the printed medium grew in popularity with its obvious advantages but also its many challenges As antiquarian printed works appeared the relationship between manuscript and printed sources also became less linear printed copies of earlier works were annotated to serve as a means of research and printed works could be copied by hand partially or even completely This book explores how antiquarian literature collections of inscriptions treatises letters developed throughout the sixteenth century both in manuscript and in print how both media interacted with each other and how these printed antiquarian works were received as attested by the manuscript annotations left by their early modern owners and readers *El viatge vertical [published on the occasion of the exhibition held at the Museu d'Art Contemporani de Barcelona, 13 July - 21 October 2012]*

how communities adapted as they underwent Christianization in island contexts emphasizing the diverse and varied ways that island landscapes became Christianized as well as how other political and economic factors shaped the dynamics of change
