

The background of the cover is a dark field filled with a dense network of fine, green, thread-like structures, likely representing cytoskeletal filaments. In the center, there are two prominent, glowing structures. Each structure has a bright green core surrounded by a blue, fan-like or petal-like arrangement of fibers, possibly representing a mitotic spindle or a specialized organelle. The overall appearance is that of a high-resolution fluorescence micrograph of a cell in a specific state.
