Case studies and examples discussed in the text cover a wide range of projects from large to smaller across different industries and sectors, both public and private, including megaprojects, HS2, mega events, Olympics, political projects, Brexit, health-related project implementation, LEAN, tech-related projects, Google building and restoration projects, housing, Sagrada Família, and arts and cultural projects, European Capital of Culture. Incorporating a host of learning features, both in chapters and via the supporting online resources, this textbook is essential reading for all students, managers completing a course unit in project management at either undergraduate or postgraduate level.

Beyond My Control Stuart Ross McCallum, 2008. Stuart Ross McCallum shares a true account of his battle with epilepsy, beginning with the peculiar sensations he experienced as a teenager that led to his diagnosis and concluding with his eventual recovery from a temporal lobe lobectomy. McCallum vividly describes his twenty-year journey of living with epilepsy and how this unpredictable disease has not only impacted his life but the lives of everyone around him. For years he operated a business and managed his staff while battling an ever-increasing number of seizures. As his condition worsened and his postseizure responses became more intense, he was often prone to violent outbursts that threatened his safety as well as the safety of those in his inner circle. McCallum shares how the perception of the disease and the socially unacceptable behaviors that occurred as a result of his seizures eventually forced him to risk everything he made the life-altering decision to undergo two brain operations that he hoped would provide freedom from a life of instability, danger, and stares from strangers. *Beyond My Control* provides an honest emotional look into a highly complex and often misunderstood condition and how one man's perseverance helped him break through the darkness to find hope on the other side.
