confront the environmental challenge not as a peripheral issue around public relations but as a core issue of credibility with its customers As trust in big business has declined consumer willingness to alter buying behaviour to register disapproval has accelerated As a result boardrooms in the largest companies are having to redraw their strategic procedures regarding the environment This book aims to advance the general understanding of corporate environmental governance as an issue capable of separate and detailed analysis It aims to provide not an overview but a series of test cores into the generally unexamined issues surrounding the changing ethos of corporate action and environmental investment To date the business and environment strategic conversation has reached only a minute proportion of a global audience Over the next twenty years this dialogue will transform business into the 21st century Moreover it will become internalised into a way of working within Corporate Culture Greening the Boardroom explores through case studies and surveys some of the changes in this process in Europe as well as in Asia and North America Suitable for readers in general management business government and academia this book is an important contribution to the corporate environmental debate by the author of The Environmental Audit and Business Strategy A Total Quality Approach **Public Policy Issues for Management** Rogene A. Alkhafaji,1989-09-26 Alkhafaji presents the fundamental concepts of corporate governance and suggests a new approach to the subject that focuses on the stakeholder As Alkhafaji demonstrates corporate governance has moved far from traditional concerns with purely business issues like growth and profitability and now includes public issues such as pollution equal employment opportunities insider trading and criminal conduct Using data from his own empirical studies Alkhafaji argues that the conventional board model no longer functions as originally intended He analyzes potential management reaction to alternative forms of governance bodies and concludes that the data suggest a stakeholder board would be best suited to current American conditions Organized into five parts each of which builds upon concepts discussed in the preceding chapters the volume begins by discussing the concept of the company and the changing environment in which it operates In the second section Alkhafaji addresses corporate governance in specific terms and includes survey data

showing management's reaction to traditional and nontraditional forms of corporate governance Part three looks at corporate governance in the context of social responsibility ethics and business government relations while the following chapters discuss the ongoing restructuring of American business and its relation to corporate governance The final section examines the role played by corporate governance in strategic management Numerous tables figures and models support points made in the text
